1. Introduction

MIAX created this Risk Protections Guide to assist its Members in understanding the MIAX Options Exchanges risk protections offerings.

The term “quotes” as used in this Risk Protections Guide applies equally to all MEO orders on MIAX Pearl & MIAX Sapphire, and the term “eQuote” as used in this section applies equally to all MEO orders on MIAX Sapphire.

All Protections for Market Makers are only available through MIAX Options Exchanges’ binary interfaces.

Risk protections are latency equalized unless stated otherwise. There is no latency penalty for a member when opting into and leveraging a risk protection available on the exchange as compared to a member not opting into the risk protection.

All Protections noted in this document are applied at each exchange individually. In no case does the application of a Protection at one exchange in any way affect a member’s ability to participate normally on another MIAX Exchange Group platform. Please see the appropriate exchange User’s Manual and Rulebook for additional information about each Protection

Members are able to request changes to their risk configurations via the MFP User Interface (UI). Risk configuration changes will be accepted and processed from 7:30 AM to 4:30 PM Eastern Time. For access to the MFP UI, please contact Trading Operations at TradingOperations@miaxglobal.com or 609-897-7302.

¹ Certain Protections on MIAX Pearl and MIAX Sapphire are calculated separately for orders submitted through FIX or MEO.

2. Risk Protections for Orders

a. Mandatory Protections for Orders

For protections where the outcome is subject to whether Managed Protection Override (MPO) is set or not, please refer to pg. 15 for more details about this optional protection.

Mandatory Protections for Orders

Protection	Applied Pre or Post Trade	Description	Configurability	Default	Exchanges that Support this Protection	Support for FIX/Binary	MFP UI Availability
Max Open Orders ¹	Pre-Trade	<p>Exchange Systems track the aggregate number of open orders for the Simple Market and separately track the aggregate number of open orders for the Complex Market, resting on the book for each Firm.</p> <p>Firms may define a maximum number of open orders threshold for the Simple Market and a maximum number of open orders threshold for the Complex Market, or use the Exchange default values.</p> <p>Once either the Simple Market or Complex Market, Max Open Orders threshold has been reached, the Exchange rejects all new orders for that</p>	Member configurable	<p>30,000 Simple Market Orders</p> <p>30,000 Complex Market Orders</p>	<p>☒ MIAX</p> <p>☒ Pearl</p> <p>☒ Emerald</p> <p>☒ Sapphire</p>	<p>FIX: MIAX, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	<p>Available in UI: Yes (All Scopes)</p> <p>If Yes, Functionality Available: View, edit (write access required)</p>

		<p>market but allows orders submitted prior to the threshold breach to continue to be managed and trade.</p> <p>Max Open Orders functionality provides the protection of speed bumps without entirely removing the Member from the market. To resume submitting orders, the Member must contact MIAX Trading Operations.</p>					
Max Open Contracts¹	Pre-trade	<p>Exchange Systems track the aggregate total quantity of open unexecuted contracts for the Simple Market and separately track the aggregate number of open unexecuted contracts for the Complex Market, resulting from open orders resting on the book for each Firm.</p> <p>Firms may define a maximum number of open contracts threshold for the Simple Market and a maximum number of open contracts threshold for the Complex Market or use the Exchange default values.</p> <p>Once either the Simple Market or Complex Market, Max Open Contracts threshold has been reached or exceeded, the Exchange rejects all new orders from the Firm for that market.</p> <p>To resume submitting orders, the Member must contact MIAX Trading Operations.</p>	Member configurable	<p>1,000,000 Simple Market open contracts</p> <p>1,000,000 Complex Market open contracts</p>	<p>☒ MIAX</p> <p>☒ Pearl</p> <p>☒ Emerald</p> <p>☒ Sapphire</p>	<p>FIX: MIAX, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	<p>Available in UI: Yes (All Scopes)</p> <p>If Yes, Functionality Available: View, edit (write access required)</p>

Max Order Size ¹	Pre-Trade	<p>Exchange Systems compare the quantity on each incoming order to a pre-defined Maximum Order Size. Firms may define a Maximum Order Size for orders in the Simple Market, Crossing orders in the Simple Market, orders in the Complex Market and Crossing orders in the Complex Market, or use the Exchange default values for these protections.</p> <p>In addition to the foregoing Exchange-wide settings, Firms may select Firm/Class Maximum Order Size protections that will apply specifically to a selected Class.</p> <p>Firm/Class settings supersede both the Firm provided Exchange-Wide settings and the Exchange Default Settings. If an order exceeds the Maximum Order Size protection, the Exchange rejects the order.</p> <p>Maximum Order Size is a per order protection and applies to all order types with the exception of Settlement Auction Only (SAO) orders.</p>	Member configurable	<p>10,000 Simple Market contracts</p> <p>10,000 Complex Market contracts</p>	<p>☒ MIAX</p> <p>☒ Pearl</p> <p>☒ Emerald</p> <p>☒ Sapphire</p>	<p>FIX: MIAX, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	<p>Available in UI: Yes (All Scopes)</p> <p>If Yes, Functionality Available: View, edit (write access required)</p>
Risk Protection Mechanism ("RPM"): Order Rate Protection ¹	Post-Trade	<p>Exchange Members have the ability to manage the operational risk associated with order rates. The Risk Protection Mechanism gives Members the flexibility to create multiple groups made up of a single or multiple Market Participant Identifier ("MPIDs") and define order rate thresholds specific to each group's risk tolerance.</p>	Member configurable	<p>Exchange Default: N/A</p> <p>Member Default: a minimum of one protection is required</p>	<p>☒ MIAX</p> <p>☒ Pearl</p> <p>☒ Emerald</p> <p>☒ Sapphire</p>	<p>FIX: MIAX, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	<p>Available in UI: Yes (All Scopes)</p> <p>If Yes, Functionality Available: View Only</p>

		<p>Order rates can be measured for varying durations, ranging from one second through the entire trading session.</p> <p>Members may assign multiple order rates to each group allowing them to detect microbursts of activity or activity that the Member considers risky when monitored over time.</p> <p>Members must establish at least one Allowable Order Rate setting, with a corresponding specified time period of not less than one second, and not to exceed ten seconds.</p> <p>The maximum time period for this protection will be established by the Exchange and communicated to Members via Regulatory Circular.</p> <p>The System generates warnings to a member when a group reaches both 70% and 90% of its threshold.</p> <p>Once a threshold is exceeded, the System rejects new orders and, if configured by the Member's request, cancels all open day orders submitted by all MPIDs in the group.</p> <p>For a group to resume trading, the Member must contact MIAX Trading Operations.</p>					
--	--	--	--	--	--	--	--

<p>Risk Protection Mechanism (“RPM”): Executed Contract Rate Protection¹</p>	<p>Post-Trade</p>	<p>Exchange Members have the ability to manage the operational risk associated with contracts executed from orders.</p> <p>The Risk Protection Mechanism gives Members the flexibility to create multiple groups, made up of a single or multiple MPIDs, and define the maximum number of executed contracts allowed for each group with a Firm-defined time period.</p> <p>Executed contract rates can be measured for varying durations ranging from one second through the entire trading session.</p> <p>Members may assign multiple executed contract rates to each group allowing them to monitor for microbursts of activity that a member considers risky when monitored over time.</p> <p>Members must establish at least one Contract Execution Rate setting, with a corresponding specified time period of not less than one second, and not to exceed ten seconds.</p> <p>The maximum time period for this protection will be established by the Exchange and communicated to Members via Regulatory Circular.</p> <p>The System generates warnings to a Member when a group reaches both 70% and 90% of its threshold.</p>	<p>Member configurable</p>	<p>Exchange Default: N/A</p> <p>Member Default: a minimum of one protection is required</p>	<p> <input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire </p>	<p>FIX: MIAx, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	<p>Available in UI: Yes (All Scopes)</p> <p>If Yes, Functionality Available: View Only</p>
--	-------------------	---	----------------------------	---	---	--	--

		<p>Once an execution occurs which causes the total number of executed contracts within the defined time frame to exceed the Executed Contract Rate Protection threshold, the System rejects all subsequent new orders, and if configured by the Member's request cancels all day orders submitted by the group.</p> <p>For a group to resume trading, the Member must contact MIAX Trading Operations.</p>					
MIAX Order Monitor (MOM) No Bid – Offer Threshold	Pre-Trade	<p>If the Exchange, upon initial receipt or reevaluation, evaluates a market order to sell an option when</p> <ul style="list-style-type: none"> The national best bid is zero and the national best offer is greater than the Exchange default threshold setting or the Member designated threshold setting, or The resulting national best bid is zero after any final trade or routed order, the System will cancel the market order to sell. <p>If the National Best Offer is equal to or less than</p> <ul style="list-style-type: none"> The Exchange default threshold setting or the Member designated threshold setting, or The resulting national best bid is zero after any final trade or routed order at the time of evaluation, 	Member Configurable	Exchange Setting: \$0.10	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: Yes (All Scopes) If Yes, Functionality Available: View, edit (write access required)

		the System will convert the sell market order to a sell limit order with a price of one Minimum Price Variation ("MPV") and post the order on the book.					
Max Put Price Protection for Orders	Pre-Trade	<p>The Exchange will reject, manage or cancel orders for a put option with a price that exceeds the Maximum Put Price</p> <ul style="list-style-type: none"> Maximum price of a Put Option is the Strike price plus the Put Price Variance (PPV) setting Put bid orders priced through the maximum value (bid higher than the top limit) will trade up to and including the maximum value, then will be managed at the limit of the allowable trading range, or cancel subject to Managed Protection Override (MPO) Put Offer orders priced higher than the maximum value will be rejected. 	Not Configurable	Exchange Setting: PPV: \$0.10	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No
Max Liquidity Price Check for Orders	Pre-Trade	Maximum Order Price field check. The Exchange System will reject a new order for the Simple Market, with a price that exceeds the Maximum Liquidity Price.	Not Configurable	Exchange Setting: \$5,499.99	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No

MIAX Order Monitor (MOM) Limit Order Opposite Price Percent and Value	Pre-Trade	<p>The Exchange will reject limit orders for the Simple Market, priced through the opposite side of the NBBO by an amount greater than X% of the NBBO or \$Y, whichever is less, with the exception of:</p> <ul style="list-style-type: none"> When the Simple Market NBO is less than or equal to \$W, the Exchange will only reject limit orders to buy with a price that is greater than the NBO by \$0.25 or more When the NBB is less than or equal to \$Z, the Exchange will accept any properly submitted limit order to sell 	Not Configurable	<p>Exchange Setting: X initially set to 50% Y initially set to \$2.50 Z initially set to \$0.25 W initially set to \$0.50</p>	<p>☒ MIAX ☒ Pearl ☒ Emerald ☒ Sapphire</p>	<p>FIX: MIAX, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	Available in UI: No
Complex MIAX Order Monitor (cMOM) Limit Order Opposite Price Value	Pre-Trade	<p>The Exchange will reject limit orders for the Complex Market, priced through the opposite side of the cNBBO by an amount greater than \$2.50.</p>	Not Configurable	<p>Exchange Setting: \$2.50</p>	<p>☒ MIAX ☐ Pearl ☒ Emerald ☒ Sapphire</p>	<p>FIX: MIAX, Emerald, Sapphire</p> <p>MEO: Sapphire</p>	Available in UI: No

b. Optional Protections for Orders

Optional Protections for Orders

Protection	Applied Pre or Post Trade	Description	Configurability	Default	Exchanges that Support this Protection	Support for FIX/Binary	MFP UI Availability
Managed Protection Override (MPO)	Pre-Trade	<p>MPO provides member firms the ability to optionally cancel an order that would otherwise be subject to management pursuant to the following protections:</p> <ul style="list-style-type: none"> • Max Put Price Protection • Vertical Spread Protection • Calendar Spread Protection • Butterfly Spread Protection • Parity Price Protection 	Member Configurable at Firm Level (Yes/No)	No	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No
MIAX Variable Price Protection (MVP)	Pre-Trade	<p>Similar to the Exchange default of 5 Minimum Price Variations (MPVs) MIAX's Variable Price (MVP) Protection multi-tick price collar limits how far outside the NBBO at the time of initial evaluation an order can "walk the book".</p> <p>For each order, Members instruct how many ticks from the original opposite side NBBO the order can trade.</p>	Member configurable order-by-order: 0 to 20	Exchange Default: 5 ticks	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No

		<p>Members can select a multi-tick value within the allowable range.</p> <p>When specified, the Member provided multi-tick value replaces the Exchange Default Intraday Price Collar value for that order.</p> <p>The Order will not be displayed or executed outside the less aggressive of its limit price or its protected price and will be cancelled by the System if its protection limit would be exceeded.</p>					
--	--	--	--	--	--	--	--

c. Order Irregularity and Exception checks

Order Irregularity and Exception checks							
Protection	Applied Pre or Post Trade	Description	Configurability	Default	Exchanges that Support this Protection	Support for FIX/Binary	MFP UI Availability
Real-Time High Order Rates ¹	Pre-Trade	<p>Exchange Systems monitor each Firm's order rates in real-time to watch for atypical behavior.</p> <p>If the System detects a Firm's order rate is higher than normal, it sends an alert to Trading Operations.</p> <p>MIAX Trading Operations may contact the Member to confirm whether the higher order rate is intended.</p> <p>The Real-Time High Order Rate monitoring functionality provides the protection of a speed bump without removing the Member from the market.</p>	N/A	N/A	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	<p>FIX: MIAX, Pearl, Emerald, Sapphire</p> <p>MEO: Pearl, Sapphire</p>	Available in UI: No

Minimum Price Variation Check	Pre-Trade	The Exchange will reject limit orders with an invalid Minimum Price Variation (MPV).	N/A	N/A	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No
Opening Price Collar: Expanded Quote Range ("EQR")	Pre-Trade	<p>MIAX Option and MIAX Emerald's Expanded Quote Range provides a price protection collar for orders during the opening and during re-opening following a market halt.</p> <p>Any orders that participate in the Exchange's opening process will only execute at prices at or within the collar.</p> <p>The Exchange determines the EQR by evaluating its book's two-sided quotes that meet valid-width requirements.</p> <p>As an additional precaution, the Exchange also considers the best away valid-width market when determining the EQR to provide our members with away-market price protection.</p> <p>The Exchange subtracts a predefined offset from the best bid and adds a predefined offset to the best offer to define the EQR.</p>	Please see the Appendix for the predefined offset grid	N/A	<input checked="" type="checkbox"/> MIAX <input type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input type="checkbox"/> Sapphire	FIX: MIAX, Emerald	Available in UI: No

		<p>The Exchange predefines the offsets conservatively to establish tight collars that further mitigate the risk of orders executing at erroneous prices.</p> <p>The System executes orders at prices at or within the EQR, routing eligible orders to any away markets at the NBBO if necessary, and then if necessary, at prices outside the NBBO, but at or within the collar.</p> <p>After trading the greatest allowable number of contracts, the System cancels any unexecuted balance of orders priced through the opening price in multi-list products.</p>					
MIAX Price Collars (“MPC”) and MIAX Strategy Protected Price (MSPP) for Complex Orders	Pre-Trade	<p>MIAX Price Collars is an Exchange-wide system for Complex Orders that will prevent them from executing at potentially erroneous prices by establishing temporary price limits (MPC Prices) or final collar price (MSPP), beyond which the complex order will not be displayed or executed.</p> <p>Complex orders are displayed and/or executed according to normal complex order handling procedures until reaching the first of,</p> <ul style="list-style-type: none"> • Their limit price • Their current MPC price • Their final MSPP collar price <p>Any time liquidity would otherwise (i) auction, (ii) trade, or (iii) post at a</p>	Not Configurable	<p>Exchange Setting: MPC: \$0.25</p> <p>MSPP: \$2.50</p>	<p>☒ MIAX</p> <p>☐ Pearl</p> <p>☒ Emerald</p> <p>☒ Sapphire</p>	<p>FIX: MIAX, Emerald, Sapphire</p> <p>MEO: Sapphire</p>	Available in UI: No

		<p>price more aggressive than the current MPC or final MSPP collar price, the System will initiate a Complex Liquidity Exposure Process (cLEP) Auction.</p> <p>The cLEP Auction uses the Standard Complex Auction methodology. The cLEP Auction Start Price is the MPC Price.</p> <p>After a complex order has been subjected to a cLEP Auction, its MPC Price will advance to a more aggressive level which will become its next MPC Price, unless the order has advanced to its final MSPP collar price and subject to cancellation.</p> <p>The next MPC Price is determined by adding (for protected buy interest) or subtracting (for protected sell interest) the MPC Value to/from the then existing MPC Price.</p> <p>MPC protection will continue until an order has been</p> <ul style="list-style-type: none"> • Fully executed • Posted at its limit price • Cancelled 					
--	--	--	--	--	--	--	--

Duplicate Order ID Check¹	Pre-Trade	Order validation check for duplicate order ID's. If the Exchange receives an order with a duplicate order ID, the Exchange will reject the order.	N/A	N/A	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No
Time Stamp Validation	Pre-Trade	The Exchange checks the time stamp on incoming orders for stale or queued orders. If the Exchange receives the order more than sixty seconds from the order's original time stamp, the Exchange will reject the order.	Not Configurable	Exchange Setting: 60 seconds	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No
Self-Trading Protection for Orders	Pre-Trade	In the event that a Market Maker sends an order priced at a limit that would allow it to interact with a quote or order from that same Market Maker MPID that is resting on the opposite side of the market, the resting quote or order from that Market Maker MPID will be cancelled and the new order will be accepted.	N/A	N/A	<input checked="" type="checkbox"/> MIAX <input checked="" type="checkbox"/> Pearl <input checked="" type="checkbox"/> Emerald <input checked="" type="checkbox"/> Sapphire	FIX: MIAX, Pearl, Emerald, Sapphire MEO: Pearl, Sapphire	Available in UI: No

3. Risk Protections for Quotes/eQuotes

a. Mandatory Protections for Quotes/eQuotes

Mandatory Protections for Quotes							
Protection	Applied Pre or Post Trade	Description	Configurability	Default	Exchanges that Support this Protection	Support for FIX/Binary	MFP UI Availability
ARM	Post-Trade	<p>The Aggregate Risk Manager (“ARM”) tracks the number of contracts traded by a Market Maker, represented as a percentage of quote size, in an assigned option class within a specified time period.</p> <p>ARM is in effect at the opening and throughout the trading day. Market Makers establish a percentage of their quotation size (Allowable Engagement Percentage) and the time period for each option class.</p> <p>In the absence of a Market Maker established percentage and time period, Exchange defaults will apply.</p> <p>When an execution against a Market Maker’s Standard quote</p>	<p>Member configurable by class</p> <p>Minimum allowable Engagement Percentage: 1%</p> <p>Reset on Quote (RoQ) can be set to (On/Off)</p>	<p>105% over 1 second for Market Makers</p> <p>The default value for RoQ is On</p> <p>There is NO default value for Pearl EEMs</p>	<p>☒ MIAx</p> <p>☒ Pearl</p> <p>☒ Emerald</p> <p>☒ Sapphire</p>	<p>MEI: MIAx, Emerald</p> <p>MEO: Pearl, Sapphire</p>	<p>Available in UI: No</p>

		<p>occurs, the System looks back over the specified time period to determine whether the executed contract quantity equals or exceeds the Allowable Engagement Percentage.</p> <p>If triggered, ARM automatically:</p> <ul style="list-style-type: none"> • Purges all of the Market Maker Standard quotes from the class • Blocks new quotes until an ARM re-entry is sent via MIA X Express Interface (“MEI”) or MIA X Express Order Interface (MEO) • Allows MIA X eQuotes to continue to be sent while ARM is effect. <p>Members may choose one of two Reset on Quote (“RoQ”) settings:</p> <ul style="list-style-type: none"> • Reset on Quote (the default behavior) will reset the executed contract count on the bid (or ask) side of any option where the Firm has submitted a revised bid (or ask) quote • Do NOT Reset on Quote will NOT reset the executed contract count on the bid (or ask) side of any option where the Firm has submitted a revised bid (or ask) quote, and will include ALL CONTRACTS
