

MIAX Futures Large Trader Reporting FIXML Transition Advisory

Published September 10, 2026

MIAX Futures LTR FIXML Transition Advisory

Associated with MIAX Futures Rule 2.3.5.

On April 30, 2024 the Commodity Futures Trading Commission (“Commission”) published new Large Trader Reporting rules to amend its large trading reporting regulations for futures and options. Among other things, Part 17 governs the technical formatting standards for which large trader position reports are submitted to the CFTC. The amendments have the effect of transitioning from the legacy 80-byte large trader position reporting format to a new FIXML-based format and adding data fields to the submissions. In accordance with MIAX Futures Rule 2.3.5, MIAX Futures will require large trader position reports to the Exchange to be in the same format prescribed by CFTC Part 17 beginning **July 26, 2027**, the updated compliance date for CFTC Part 17. For further information on the new format of the large trader position reports, please see the CFTC Part 17 Guidebook available [here](#).

Beginning on or about **October 1, 2026**, MIAX Futures Unique Instrument Codes (“UICs”) for each product will be available in CSV format on the MIAX Futures website [here](#). As noted in the CFTC Part 17 Guidebook, UICs may be utilized by reporting firms in the identification of specific reportable markets in large trader position reports. The Exchange encourages all reporting firms to review the UICs to determine their utilization in their firm’s large trader position reporting. Firms may begin submitting test files to the MIAX Futures SFTP the week of **October 26, 2026** with the following naming convention:

Direction Submission Files:

LTPOS_[3-letter CFTC-assigned firm ID]_[3-letter CFTC-assigned firm ID]_[YYYYMMDD].fixml

e.g. LTPOS_ABC_ABC_20160601.fixml

On Behalf Files:

LTPOS_[3-letter CFTC-assigned firm ID]_[3-Letter On-Behalf-Of firm ID]_[YYYYMMDD].fixml

e.g. LTPOS_ABC_DEF_20160601.fixml
