### **Background Information on the Fund**

Roundhill ETF Trust (the “Trust”) is a management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), consisting of several investment portfolios. This circular relates only to the Funds listed above (each, a “Fund” and together, the “Funds”). The shares of the Fund are referred to herein as “Shares”.

**Roundhill S&P 500® 0DTE Covered Call Strategy ETF** - The Fund seeks to achieve its investment objectives through the use of a synthetic covered call strategy that provides current income on a weekly

basis, while also providing exposure to the price return of the S&P 500® Index. In effectuating its investment strategy, the Fund will purchase and sell a combination of call option contracts that utilize the S&P 500® Index as the reference asset. The Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in financial instruments (such as options contracts) that utilize the S&P 500® Index as the reference asset. For purposes of compliance with this investment policy, derivative contracts (i.e. options contracts) will be valued at their notional value. The Fund's sold call options will generally have zero days to expiration, known as "0DTE" options, when sold by the Fund. At market open, or shortly thereafter, on every business day, the Fund generally sells out-of-the-money 0DTE call options on the S&P 500® Index that will expire at the end of the day. The Fund's purchased call options will be struck deep-in-the-money and have a longer maturity when purchased, thereby offering synthetic long exposure to the S&P 500® Index.

**Roundhill N-100 0DTE Covered Call Strategy ETF** - The Fund seeks to achieve its investment objectives through the use of a synthetic covered call strategy that provides current income on a weekly basis, while also providing exposure to the price return of the Nasdaq-100 Index (the "N-100 Index"). In effectuating its investment strategy, the Fund will purchase and sell a combination of call option contracts that utilize the N-100 Index as the reference asset. The Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in financial instruments (such as options contracts) that utilize the N-100 Index as the reference asset. For purposes of compliance with this investment policy, derivative contracts (i.e. options contracts) will be valued at their notional value. The Fund's sold call options will generally have zero days to expiration, known as "0DTE" options, when sold by the Fund. At market open, or shortly thereafter, on every business day, the Fund generally sells out-of-the-money 0DTE call options on the N-100 Index that will expire at the end of the day. The Fund's purchased call options will be struck deep-in-the-money and have a longer maturity when purchased, thereby offering synthetic long exposure to the N-100 Index.

Each Fund will issue and redeem Shares on a continuous basis at their net asset value ("NAV") only in large blocks of 10,000 Shares (each, a "Creation Unit"). Creation Units will be issued and redeemed principally in-kind for securities included in the underlying index. Except when aggregated in Creation Units, the Shares may not be redeemed with the Funds.

Shares are held in book-entry form, which means that no Share certificates are issued. The Depository Trust Company or its nominee is the record owner of all outstanding Shares of the Funds and is recognized as the owner of all Shares for all purposes.

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day after the close of trading (ordinarily 4:00 p.m., Eastern Time or "ET") of the New York Stock Exchange. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

## **Principal Risks**

Interested persons are referred to the discussion in the prospectus for the Fund of the principal risks of an investment in the Fund. These include tracking error risk (factors causing a Fund's performance to not match the performance of its underlying index), market trading risk (for example, trading halts, trading above or below net asset value), investment style risk, sector risk, investment approach risk, non-diversification risk, issuer-specific risk, management risk, concentration risk, equity securities risk, and passive investment risk.

- 1) such bids or purchases are effected in the ordinary course of business, in connection with a basket of 20 or more securities in which any security that is the subject of a distribution, or any reference security, does not comprise more than 5% of the value of the basket purchase; or
- 2) purchases are effected as adjustments to such basket in the ordinary course of business as a result of a change in the composition of the underlying index; and
