SR-MIAX-2025-37 Exhibit 5.docx

The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

**Partial Amendment**

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

## **11. Text of the Proposed Rule Change**

(a) Miami International Securities Exchange, LLC (“MIAX” or the “Exchange”), pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”)<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> proposes to amend Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits to increase the position and exercise limits for iShares Bitcoin Trust ETF (“IBIT”).

Notice of the proposed rule change for publication in the Federal Register is attached hereto as Exhibit 1, and the text of the proposed rule change is attached hereto as Exhibit 5.

(b) Not applicable.

(c) Not applicable.

## **2. Procedures of the Self-Regulatory Organization**

The proposed rule change was approved by the Chief Executive Officer of the Exchange or his designee pursuant to authority delegated by the Exchange Board of Directors on February 27, 2025. Exchange staff will advise the Board of Directors of any action taken pursuant to delegated authority. No other action by the Exchange is necessary for the filing of the proposed rule change.

Questions and comments on the proposed rule change may be directed to Tanya Kitaigorovski, AVP, Associate Counsel, at (609) 413-5787.

## **3. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

### **a. Purpose**

The Exchange proposes to amend Exchange Rule 307, Position Limits, and Exchange

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

Rule 309, Exercise Limits,<sup>3</sup> to permit IBIT to increase its position and exercise limits for options on IBIT from 25,000 contracts by removing IBIT from Interpretation and Policy .01 to Exchange Rule 307 and Interpretation and Policy .01 to Exchange Rule 309. This is a competitive filing based on a similar proposal submitted by Nasdaq ISE, LLC (“ISE”) and approved by the Securities and Exchange Commission (“Commission”).<sup>4</sup>

IBIT is an Exchange-Traded Funds (“ETF”) that holds bitcoin and is listed on the Nasdaq Stock Market LLC.<sup>5</sup> In November 2024, the Exchange received approval to list options on IBIT.<sup>6</sup> The position and exercise limits for IBIT options are 25,000 contracts as stated in Interpretation and Policy .01 to Exchange Rule 307, Position Limits, and Interpretation and Policy .01 to Exchange Rule 309, Exercise Limits the lowest limit available in options.<sup>7</sup>

Per the Commission “rules regarding position and exercise limits are intended to prevent the establishment of options positions that can be used or might create incentives to manipulate

---

<sup>3</sup> The Exchange notes that all the rules of Chapter III of MIA X, including Rules 307 and 309, are incorporated by reference into the rulebooks of MIA X Emerald, LLC, MIA X Pearl, LLC and MIA X Sapphire, LLC.

<sup>4</sup> See Securities Exchange Act Release No. 103564 (July 29, 2025) (SR-ISE-2024-62) (Self-Regulatory Organizations; Nasdaq ISE, LLC; Order Approving a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, Regarding Position and Exercise Limits for Options on the iShares Bitcoin Trust ETF)(“ISE Approval Order”).

<sup>5</sup> Nasdaq received approval to list and trade Bitcoin-Based Commodity-Based Trust Shares in IBIT pursuant to Rule 5711(d) of Nasdaq. See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008 (January 17, 2024) (SR-NASDAQ-2023-016) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, To List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units). IBIT started trading on January 11, 2024.

<sup>6</sup> See Securities Exchange Act Release No. 101698 (November 21, 2024), 89 FR 93802 (November 27, 2024) (SR-MIAX-2024-40) (Self-Regulatory Organizations; MIA X Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits To Allow the Exchange To List and Trade Options on the iShares Bitcoin Trust (the “Trust”)(“IBIT Approval Order”). The Exchange began trading IBIT options on November 20, 2024.

<sup>7</sup> Options on Fidelity Wise Origin Bitcoin Fund, ARK 21Shares Bitcoin ETF, Grayscale Bitcoin Trust (BTC), Grayscale Bitcoin Mini Trust BTC, and Bitwise Bitcoin ETF are also subject to a 25,000 contract position and exercise limit.

or disrupt the underlying market so as to benefit the options positions.”<sup>8</sup> For this reason, the Commission requires that “position and exercise limits must be sufficient to prevent investors from disrupting the market for the underlying security by acquiring and exercising a number of options contracts disproportionate to the deliverable supply and average trading volume of the underlying security.”<sup>9</sup> Based on its review of the data and analysis provided by the Exchange, the Commission concluded that the 25,000 contract position limit for IBIT options satisfied these objectives.<sup>10</sup>

While the Exchange proposed an aggregated 25,000 contract position limit for IBIT options in its IBIT Approval Order, it nonetheless believed that evidence existed to support a much higher position limit. Specifically, the Commission has considered and reviewed the Exchange’s analysis and ISE’s analysis as it was presented by the Exchange in the IBIT Approval Order that the exercisable risk associated with a position limit of 25,000 contracts represented only 0.4% of the outstanding shares of IBIT.<sup>11</sup> The Commission also has considered and reviewed the Exchange’s statement in its IBIT Approval Order that with a position limit of 25,000 contracts on the same side of the market and 611,040,000 shares of IBIT outstanding, 244 market participants would have to simultaneously exercise their positions to place IBIT under stress.<sup>12</sup> Based on the Commission’s review of this information and analysis, the Commission concluded that the proposed position and exercise limits of 25,000 contracts were designed to prevent investors from disrupting the market for the underlying security by acquiring and

<sup>11</sup> See id. Data represents figures from August 12, 2024.

<sup>12</sup> See id. Data represents figures from August 12, 2024.

exercising a number of options contracts disproportionate to the deliverable supply and average trading volume of the underlying security, and to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position.<sup>13</sup>

IBIT currently qualifies for a 250,000 contract position limit pursuant to the criteria in Exchange Rule 307(d)(5), which requires that, for the most recent six-month period, trading volume for the underlying security be at least 100 million shares.<sup>14</sup> As of November 25, 2024, the market capitalization for IBIT was \$46,783,480,800<sup>15</sup> with an average daily volume (“ADV”), for the preceding three months prior to November 25, 2024, of 39,421,877 shares. IBIT is well above the requisite minimum of 100 million shares necessary to qualify for the 250,000 contract position limit. Also, as of November 25, 2024, there are 19,787,762 bitcoins in circulation.<sup>16</sup> According to calculations done by ISE as presented in Amendment No. 2,<sup>17</sup> at a price of \$94,830,<sup>18</sup> that equates to a market capitalization of greater than \$1.876 trillion US. If a position limit of 250,000 contracts were considered, the exercisable risk would represent

---

<sup>13</sup> See id.

<sup>14</sup> Exchange Rule 307, Position Limits, provides at subparagraph (d)(5) that to be eligible for the 250,000 contract limit, either the most recent six(6) month trading volume of the underlying security must have totaled at least 100 million shares or the most recent six(6) month trading volume of the underlying security must have totaled at least seventy-five (75) million shares and the underlying security must have at least 300 million shares currently outstanding.

<sup>15</sup> The market capitalization was determined by multiplying a settlement price of (\$54.02) by the number of shares outstanding (866,040,000). This figure was acquired as of November 25, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust-etf>.

<sup>16</sup> See <https://www.coingecko.com/en/coins/bitcoin>.

<sup>17</sup> See Amendment No. 2 to Proposed Rule Change to modify the position and exercise limits for IBIT options to the applicable position and exercise limits as determined by Options 9, Sections 13 and 15 (SR-ISE-2024-62), filed Mar. 26, 2025, available at <https://www.sec.gov/comments/srise-2024-62/srise202462-593575-1721782.pdf>. (“Amendment No. 2”).

<sup>18</sup> This is the approximate price of bitcoin from 4:00pm ET on November 25, 2024.

2.89%<sup>19</sup> of the outstanding shares outstanding of IBIT. Given IBIT's liquidity, the current 25,000 position limit is extremely conservative.

Position limits, and exercise limits, are designed to limit the number of options contracts traded on the exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. These limits, which are described in Exchange Rules 307 and 309, are intended to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. Position and exercise limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that could be used for legitimate economic purposes.

To achieve this balance, the Exchange proposes to remove IBIT from the table of position limits in Interpretation and Policy .01 to Exchange Rule 307 as well as the table of exercise limits in Interpretation and Policy .01 to Exchange Rule 309 so that options on IBIT may trade similar to all other options for which the Exchange has not filed to otherwise increase the position limits to levels outside of the limits of Exchange Rule 307(d). As a result of removing IBIT from the aforementioned tables, it would increase the position and exercise limits for options on IBIT from 25,000 to 250,000 contracts based on the parameters of Exchange Rule 307(d). By removing IBIT from the aforementioned tables, IBIT would be subject to subsequent six (6) month reviews to determine future position and exercise limits similar to all other options subject to Exchange Rules 307 and 309.

In addition to IBIT's Exchange Rule 307(d) eligibility for 250,000 contracts, the

---

<sup>19</sup> This percentage is arrived at with this equation:  $(250,000 \text{ contract limit} * 100 \text{ shares per option} / 866,040,000 \text{ shares outstanding})$ .

Exchange performed additional analysis relying on data presented in Amendment No.2, with respect to IBIT. First, in Amendment No. 2, ISE considered IBIT's market capitalization and ADV, and prospective position limit in relation to other securities. In measuring IBIT against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporations ("OCC").<sup>20</sup> This pool of data took into consideration 3,897 options on single stock securities, excluding broad based ETFs.<sup>21</sup> Next, ISE aggregated the data based on market capitalization and ADV and grouped option symbols by position limit utilizing statistical thresholds for ADV, based on ninety days, and market capitalization that were one standard deviation above the mean for each position limit category (i.e. 25,000, 50,000 to 65,000, 75,000, 100,000 to less than 250,000, and 250,000).<sup>22</sup> Exchange Rule 307(d) sets out position limits for various contracts. For example, on ISE like on the Exchange, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. ISE performed an exercise to demonstrate IBIT's position limit relative to other options symbols in terms of market capitalization and ADV. For reference the market capitalization for IBIT was \$46,783,480,800<sup>23</sup> with an ADV, for the preceding three months prior to November 25, 2024, of 39,421,877

---

<sup>20</sup> The computations are based on OCC data from November 25, 2024. Data displaying zero values in market capitalization or ADV were removed.

<sup>21</sup> IBIT has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

<sup>22</sup> Exchange Rule 307 sets out position limits for various contracts. For example, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. The Exchange notes that position limits may also be higher due to corporate actions in the underlying equities, such as a stock split. See <https://www.theocc.com/market-data/market-data-reports/series-and-trading> data/position-limits. As a result, the Exchange's pool of data considered higher position limits than 250,000 contracts, where applicable.

<sup>23</sup> The market capitalization was determined by multiplying a settlement price of (\$54.02) by the number of shares outstanding (866,040,000). This figure was acquired as of November 25, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust-etf>.

<b>rank</b>	<b>%</b>	<b>%</b>	<b>%</b>	<b>%</b>			

Based on the above table, as presented in Amendment No. 2,<sup>25</sup> if IBIT were compared to the 1,934 stocks that have position limits of 250,000 contracts to less than 500,000 contracts it would rank in the 88th percentile for market capitalization and the 99th percentile for ADV.

ISE, in Amendment No. 2, also analyzed the position limits for IBIT by regressing the market capitalization figures and 90-day ADV of all non-ETF equities, against their respective position limit figures.<sup>26</sup> From this regression, ISE was able to determine the implied coefficients to create a formulaic method for determining an appropriate position limit.<sup>27</sup> In this case, the modeled position limit is 565,796 contracts.<sup>28</sup> The results of ISE's study are below.

<i>Regression Statistics</i>	
Multiple R	0.496800597

Based on the aforementioned analysis, as performed by ISE in Amendment No. 2, the Exchange believes that the proposed 250,000 contracts for position and exercise limits is appropriate.

Second, ISE reviewed IBIT's data relative to the market capitalization of the entire bitcoin market in terms of exercise risk and availability of deliverables. As of November 25, 2024, there are 19,787,762 bitcoins in circulation.<sup>29</sup> At a price of \$94,830,<sup>30</sup> that equates to a market capitalization of greater than \$1.876 trillion US. If a position limit of 250,000 contracts

<sup>29</sup> See <https://www.coingecko.com/en/coins/bitcoin>.

<sup>30</sup> This is the approximate price of bitcoin from 4:00pm ET on November 25, 2024.

were considered, the exercisable risk would represent 2.89%<sup>31</sup> of the outstanding shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer, additionally it can be compared the position limit sought to the total market capitalization of the entire bitcoin market and in that case, the exercisable risk for options on IBIT would be less than 0.072% of all bitcoin outstanding. Assuming a scenario where all options on IBIT shares were exercised given the proposed 250,000 per same side position and exercise limits, this would have a virtually unnoticed impact on the entire bitcoin market. This analysis demonstrates that the proposed 250,000 per same side position and exercise limits are appropriate for options on IBIT given its liquidity.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission (“CFTC”). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent bitcoin futures position limits. In particular, ISE looked at the CME bitcoin futures contract<sup>32</sup> that has a position limit of 2,000 futures.<sup>33</sup> On October 22, 2024, CME bitcoin futures settled at \$94,945.<sup>34</sup> On October 22, 2024, IBIT settled at \$54.02, which would equate to greater than 17,557,898 shares of IBIT if the CME notional position limit was utilized. Since substantial portions of any distributed options portfolio are likely to be out of the money on expiration, an options position limit equivalent to the CME position limit for bitcoin futures (considering that

---

<sup>31</sup> This percentage is arrived at with this equation:  $(250,000 \text{ contract limit} * 100 \text{ shares per option} / 866,040,000 \text{ shares outstanding})$ .

<sup>32</sup> CME Bitcoin Futures are described in Chapter 350 of CME’s Rulebook.

<sup>33</sup> See the Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5 of CME’s Rulebook.

<sup>34</sup> 2,000 futures at a 5 bitcoin multiplier (per the contract specifications) equates to \$949,450,000  $(2000 \text{ contracts} * 5 \text{ BTC per contract} * \$94,945 \text{ price of November BTC future})$  of notional value.

all options deltas are  $\leq 1.00$ ) should be a bit higher than the CME implied 175,578 limit. Of note, unlike options contracts, CME position limits are calculated on a net futures equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).<sup>35</sup> Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.<sup>36</sup> If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading, but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Based on the aforementioned analysis, the Exchange believes that the proposed 250,000 contracts for position and exercise limits is appropriate.

Fourth, ISE analyzed a position and exercise limit of 250,000 for IBIT options against other options on ETFs with an underlying commodity, namely SPDR Gold Shares ("GLD") ETF, iShares Silver Trust ("SLV") ETF, and ProShares Bitcoin ETF ("BITO").<sup>37</sup> GLD has a float of 306.1 million shares<sup>38</sup> and a position limit of 250,000 contract. SLV has a float of 520.7 million shares,<sup>39</sup> and a position limit of 250,000 contracts. Finally, BITO has 107.65 million shares

---

<sup>35</sup> See <https://www.cmegroup.com/education/courses/market-regulation/position-limits/positionlimits-aggregation-of-contracts-and-table.htm>.

<sup>36</sup> Id.

<sup>37</sup> GLD, SLV and BITO each hold one asset in trusts similar to IBIT.

<sup>38</sup> See <https://www.ssga.com/us/en/intermediary/etfs/spdr-gold-shares-gld>.

<sup>39</sup> See <https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

outstanding<sup>40</sup> and a position limit of 250,000 contracts. As previously noted, position and exercise limits are designed to limit the number of options contracts traded on the exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. A position limit exercise in GLD would represent 8.17% of the float of GLD; a position limit exercise in SLV would represent 4.8% of the float of SLV, and a position limit exercise of BITO would represent 23.22% of the float of BITO. In comparison, a 250,000 contract position limit in IBIT would represent 2.89% of the float of IBIT. Consequently, the 250,000 proposed IBIT options position and exercise limit is more conservative than the standard applied to GLD, SLV and BITO, and appropriate. Additionally, the Exchange notes that the Cboe Bitcoin U.S. ETF Index Options (CBTX) and the Cboe Mini Bitcoin U.S. ETF Index Options (MBTX),<sup>41</sup> which trade exclusively on Cboe, are comprised of multiple bitcoin ETFs of which IBIT is the highest weighted (at 20%) in the index composition.<sup>42</sup> These indices currently trade pursuant to a 24,000 contract position and exercise limit.<sup>43</sup>

Fifth, the Exchange and ISE note that IBIT began trading in penny increments as of January 2, 2025 pursuant to the Penny Interval Program.<sup>44</sup> The Commission noted that evidence

---

<sup>40</sup> See <https://www.marketwatch.com/investing/fund/bitio>.

<sup>41</sup> MBTX is based on 1/10th the value of the Cboe Bitcoin U.S. ETF Index.

<sup>42</sup> See [https://www.cboe.com/tradable\\_products/bitcoin-etf-indexoptions?utm\\_source=mcae&utm\\_medium=email&utm\\_campaign=bitcoin\\_eft\\_options\\_launch](https://www.cboe.com/tradable_products/bitcoin-etf-indexoptions?utm_source=mcae&utm_medium=email&utm_campaign=bitcoin_eft_options_launch). Cboe's website provides a product comparison chart indicating that CBTX and MBTX are permitted to trade FLEX as compared to spot bitcoin ETF options. See [https://cdn.cboe.com/resources/membership/Cboe\\_Bitcoin\\_US ETF\\_Options\\_Comparative\\_Overview.pdf?\\_gl=1\\*1xmm04c\\*\\_up\\*MQ..\\*\\_ga\\*MTc0MjU1NzU1Ni4xNzM0NTU2NTky\\*\\_ga\\_5Q99WB9X71\\*MTczNDU1NjU5MC4xLjAuMTczNDU1NjU5MC4wLjAuMA](https://cdn.cboe.com/resources/membership/Cboe_Bitcoin_US ETF_Options_Comparative_Overview.pdf?_gl=1*1xmm04c*_up*MQ..*_ga*MTc0MjU1NzU1Ni4xNzM0NTU2NTky*_ga_5Q99WB9X71*MTczNDU1NjU5MC4xLjAuMTczNDU1NjU5MC4wLjAuMA).

<sup>43</sup> See Cboe Rule 8.32(a). The Exchange notes that given the multiplier and notional value of CBTX, the index has a position and exercise limit that equates to 1,000,000 contracts of in kind exposure to IBIT, which is more than 40 times greater than the exposure for options on IBIT at the current 25,000 contract position and exercise limit.

<sup>44</sup> The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be

contained in both the Exchanges' Report and the Cornerstone analysis demonstrates that the Penny Pilot has benefitted investors and other market participants in the form of narrower spreads.<sup>45</sup> The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests). As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class that experience a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.<sup>46</sup> IBIT options are among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments. Failing to increase position and exercise limits for IBIT options, now that it is trading in finer increments, may artificially inhibit liquidity and create price inefficiency.

The Exchange believes that IBIT options has demonstrated that it has more than sufficient liquidity to garner an increased position and exercise limit of 250,000 contracts. The Exchange believes that any concerns related to manipulation and protection of investors are mollified by the significant liquidity provision in IBIT. The Exchange states that, as a general principle, increases in active trading volume and deep liquidity of the underlying securities do

---

added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Exchange Rule 501(c)(2). The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Exchange Rule 501(c)(2). See Exchange Rule 501(c)(2).

<sup>45</sup> See Securities Exchange Act Release No. 88532 (April 1, 2020), 67 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) ("Penny Approval Order").

<sup>46</sup> Id. at 19548.

not lead to manipulation and/or disruption.

The Exchange believes that increasing the position (and exercise) limits for IBIT options would lead to a more liquid and competitive market environment for IBIT options, which will benefit customers that trade these options. Further, the reporting requirement for such options would remain unchanged. Thus, the Exchange will still require that each member organization that maintains positions in impacted options on the same side of the market, for its own account or for the account of a customer, report certain information to the Exchange. This information includes, but would not be limited to, the options' positions, whether such positions are hedged and, if so, a description of the hedge(s). Market-Makers<sup>47</sup> would continue to be exempt from this reporting requirement, however, the Exchange may access Market-Maker position information.<sup>48</sup> Moreover, the Exchange's requirement that member organizations file reports with the Exchange for any customer who held aggregate large long or short positions on the same side of the market of 200 or more option contracts of any single class for the previous day will remain at this level and will continue to serve as an important part of the Exchange's surveillance efforts.<sup>49</sup>

The Exchange also has no reason to believe that the growth in trading volume in IBIT will not continue. Rather, the Exchange expects continued options volume growth in IBIT as opportunities for investors to participate in the options markets increase and evolve. The

---

<sup>47</sup> Market Makers refers to "Lead Market Makers," "Primary Lead Market Makers," and "Registered Market Makers" collectively. See Exchanged Rule 100.

<sup>48</sup> The Options Clearing Corporation ("OCC") through the Large option Position Reporting ("LOPR") system acts as a centralized service provider for Member compliance with position reporting requirements by collecting data from each Member or Member organization, consolidating the information, and ultimately providing detailed listings of each Member's report to the Exchange, as well as Financial Industry Regulatory Authority, Inc. ("FINRA"), acting as its agent pursuant to a regulatory services agreement ("RSA"). Member means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed "members" under the Exchange Act. See Exchanged Rule 100.

<sup>49</sup> See Exchanged Rule 310.

Exchange believes that the current position and exercise limits in IBIT options are restrictive and will hamper the listed options markets from being able to compete fairly and effectively with the over-the-counter (“OTC”) markets. OTC transactions occur through bilateral agreements, the terms of which are not publicly disclosed to the marketplace. As such, OTC transactions do not contribute to the price discovery process on a public exchange or other lit markets. The Exchange believes that without the proposed changes to position and exercise limits for IBIT options, market participants will find the 25,000 contract position limit an impediment to their business and investment objectives as well as an impediment to efficient pricing. As such, market participants may find the less transparent OTC markets a more attractive alternative to achieve their investment and hedging objectives, leading to a retreat from the listed options markets, where trades are subject to reporting requirements and daily surveillance. However, the Exchange notes that IBIT’s position limits would be reviewed on a six month basis, pursuant to Exchange Rule 307(d), similar to other options.

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Trust. Also the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Trust options.

The Exchange believes that the existing surveillance procedures and reporting requirements at the Exchange are capable of properly identifying disruptive and/or manipulative trading activity. The Exchange also represents that it has adequate surveillances in place to detect potential manipulation, as well as reviews in place to identify continued compliance with the

Exchange's listing standards. These procedures monitor market activity via automated surveillance techniques to identify unusual activity in both options and the underlyings, as applicable. The Exchange also notes that large stock holdings must be disclosed to the Commission by way of Schedules 13D or 13G,<sup>50</sup> which are used to report ownership of stock which exceeds 5% of a company's total stock issue and may assist in providing information in monitoring for any potential manipulative schemes. Further, the Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in equity options. Current margin and risk-based haircut methodologies serve to limit the size of positions maintained by any one account by increasing the margin and/or capital that a member organization must maintain for a large position held by itself or by its customer.<sup>51</sup> In addition, Rule 15c3-1<sup>52</sup> imposes a capital charge on member organizations to the extent of any margin deficiency resulting from the higher margin requirement.

b. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.<sup>53</sup> Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)<sup>54</sup> requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles

---

<sup>50</sup> 17 CFR 240.13d-1.

<sup>51</sup> See Exchange Rules, Chapter 15, Margins.

<sup>52</sup> 17 CFR 240.15c3-1.

<sup>53</sup> 15 U.S.C. 78f(b).

<sup>54</sup> 15 U.S.C. 78f(b)(5).

of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section (6)(b)(5)<sup>55</sup> requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that removing IBIT from the table of position limits in Interpretation and Policy .01 to Exchange Rule 307 and the table of exercise limits in Interpretation and Policy .01 to Exchange Rule 309, so its position limit would be reviewed similar to all other options for which the Exchange has not filed to otherwise establish the position limits to levels outside of the position limits of Exchange Rule 307(d) is consistent with the Act. This proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest, because it will provide market participants with the ability to more effectively execute their trading and hedging activities. Also, based on current trading volume, the resulting increase in the position (and exercise) limits for IBIT options may allow Market-Makers to maintain their liquidity in these options in amounts commensurate with the continued high consumer demand in IBIT options. Subjecting options on IBIT to the position limits in Exchange Rule 307(d) and corresponding exercise limits in Exchange Rule 309 may also encourage other liquidity providers to continue to trade on the Exchange rather than shift their volume to OTC markets, which will enhance the process of price discovery conducted on the Exchange through increased

---

<sup>55</sup>Id.

order flow. Further, this proposed change would allow institutional investors to utilize IBIT options for prudent risk management purposes. The Exchange notes that IBIT's position limits would be reviewed on a six month basis, pursuant to Exchange Rule 307(d), similar to other options.

In addition, the Exchange believes that the current liquidity in IBIT will mitigate concerns regarding potential manipulation of IBIT options and/or disruption of IBIT upon amending the table of position limits in Interpretation and Policy .01 to Exchange Rule 307 and the table of exercise limits in Interpretation and Policy .01 to Exchange Rule 309.

Additionally, the regression model performed by ISE demonstrates that the proposed position limit is half of the modeled limit given the liquidity of IBIT. Comparing IBIT's data relative to the market capitalization of the entire bitcoin market in terms of exercise risk and availability of deliverables, the Exchange was able to conclude that if a position limit of 250,000 contracts were considered, the exercisable risk would represent 2.89%<sup>56</sup> of the shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer (whereby Bitcoin is used to create IBIT shares), the position limit can be compared to the total market capitalization of the entire bitcoin market and in that case, the exercisable risk for options on IBIT would represent less than .072% of all bitcoin outstanding.<sup>57</sup> Comparing the proposed position limit to position limits for equivalent bitcoin futures position limits, the analysis demonstrated that a 250,000 contracts position and exercise limits would be appropriate.

Comparing a position limit of 250,000 for IBIT options against other options on ETFs

---

<sup>56</sup> This percentage is arrived at with this equation:  $(250,000 \text{ contract limit} * 100 \text{ shares per option} / 866,040,000 \text{ shares outstanding})$ .

<sup>57</sup> This number was arrived at with this calculation:  $((250,000 \text{ limit} * 100 \text{ shares per option} * \$54.02 \text{ settle}) / (19,787,762 \text{ BTC outstanding} * \$94,830 \text{ BTC price}))$ .

with an underlying commodity, namely GLD, SLV and BITO, a position limit exercise in GLD represents 8.17% of the float of GLD, a position limit exercise in SLV represents 4.8% of the float of SLV, and a position limit exercise of BITO represents 23.22% of the float of BITO. In comparison, a 250,000 contract position limit in IBIT options would represent 2.89% of the float of IBIT. Consequently, a 250,000 IBIT options position limit is more conservative than the standard applied to GLD, SLV and BITO, and appropriate. Also, the Exchange notes that Cboe's proprietary CBTX and MBTX indices weight IBIT the highest (at 20%) in its index composition among the other ETFs that comprise the index.<sup>58</sup> The Exchange notes that today, these indexes have a position of 24,000 contracts which is much higher than the current position limits for IBIT options when considering the notional value of the indices.<sup>59</sup> These indexes are already trading with position and exercise limits that are higher than the lowest position limit for an industry index option.<sup>60</sup>

The Exchange notes that IBIT began trading in penny increments as of January 2, 2025 pursuant to the Penny Interval Program.<sup>61</sup> The Commission noted that evidence contained in

---

<sup>58</sup> See [https://www.cboe.com/tradable\\_products/bitcoin-etf-indexoptions?utm\\_source=mcae&utm\\_medium=email&utm\\_campaign=bitcoin\\_eft\\_options\\_launch](https://www.cboe.com/tradable_products/bitcoin-etf-indexoptions?utm_source=mcae&utm_medium=email&utm_campaign=bitcoin_eft_options_launch).

<sup>59</sup> See Cboe Rule 8.32(a). The Exchange notes that given the multiplier and notional value of CBTX, the index has a position and exercise limit that equates to 1,000,000 contracts of in kind exposure to IBIT, which is more than 40 times greater than the exposure for options on IBIT at the current 25,000 contract position and exercise limit.

<sup>60</sup> 18,000 contracts is the lowest position limit for industry index options if the Exchange determines, at the time of a review conducted pursuant to subparagraph (2) of this paragraph (a), that any single underlying stock accounted, on average, for thirty percent (30%) or more of the index value during the thirty (30)-day period immediately preceding the review. See Exchange Rule 1805. Further, Cboe Rule 8.32(a)(3) permits a limit of 31,500 contracts if the Exchange determines that the conditions specified in Rule 8.32(a)(1) and (2), which would require the establishment of a lower limit, have not occurred.

<sup>61</sup> The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Exchange Rule 501(c)(2). The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in

both the Exchanges' Report and the Cornerstone analysis demonstrates that the Penny Pilot has benefitted investors and other market participants in the form of narrower spreads.<sup>62</sup> The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests). As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class that experience a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.<sup>63</sup> IBIT options are among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments pursuant to the Penny Interval Program. Failing to permit IBIT options to potentially increase position and exercise limits given the trading in finer increments, may artificially inhibit liquidity and create price inefficiency for IBIT options.

Finally, as discussed above, the Exchange's surveillance and reporting safeguards continue to be designed to deter and detect possible manipulative behavior that might arise from increasing or eliminating position and exercise limits in certain classes. The Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in the options on the underlying securities, further promoting just and equitable principles of trading, the maintenance

---

the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Exchange Rule 501(c)(2). See Exchange Rule 501(c)(2).

<sup>62</sup> See Securities Exchange Act Release No. 88532 (April 1, 2020), 67 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) ("Penny Approval Order").

<sup>63</sup> Id. at 19548.

of a fair and orderly market, and the protection of investors.

**4. Self-Regulatory Organization's Statement on Burden on Competition**

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to filings submitted by ISE.<sup>64</sup>

The Exchange's proposal does not burden intra-market competition because all Members would be subject to the position limits in Exchange Rule 307(d) and corresponding exercise limits in Exchange Rule 309. The Exchange believes that the proposed rule change will also provide additional opportunities for market participants to continue to efficiently achieve their investment and trading objectives for equity options on the Exchange.

The Exchange does not believe that the proposed rule change will impose any burden on inter-market competition as the proposal is not competitive in nature. The Exchange expects that all option exchanges will adopt substantively similar proposals, such that the Exchange's proposal would benefit competition. For these reasons, the Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

**5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others**

No written comments were either solicited or received.

**6. Extension of Time Period for Commission Action**

Not applicable.

---

<sup>64</sup> See supra note 4.

7. **Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)**

Pursuant to Section 19(b)(3)(A) of the Act<sup>65</sup> and Rule 19b-4(f)(6)<sup>66</sup> thereunder, the Exchange has designated this proposal as one that effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

The proposed rule change is substantively identical to a proposal by ISE that was recently approved by the Commission.<sup>67</sup> Additionally, the Exchange notes that the Commission recently approved a similar rule filing of another options exchange on July 29, 2025.<sup>68</sup> While that filing applies to options on different Bitcoin ETFs, the substantive issues relating to position and exercise limits to be considered are the same for options on IBIT as proposed herein. Accelerated approval is essential for competitive purposes given these recent approvals. The Exchange believes that this proposed rule change, which is essential to promote a free and open market for the benefit of investors, does not raise any new, unique or substantive issues from those raised in the recently approved ISE proposal or the NYSE Arca proposal. Therefore, the Exchange believes that the proposed rule change is well-suited for, and meets the standards applicable to, the Commission's treatment of non-controversial proposals under Section 19(b)(3)(A) of the

---

<sup>65</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>66</sup> 17 CFR 240.19b-4(f)(6).

<sup>67</sup> See supra note 4.

<sup>68</sup> See Securities Exchange Act Release No. 103568 (July 29, 2025) (SR- NYSEARCA-2025-10) (Self-Regulatory Organizations; NYSE Arca, Inc.; Order Approving a Proposed Rule Change, as Modified by Amendment No. 2, to Amend Rules Regarding Position and Exercise Limits for Options on the Grayscale Bitcoin Mini Trust ("BTC") and the Bitwise Bitcoin ETF ("BITB") and to Permit Flexible Exchange Options on BTC and BITB).

Act<sup>69</sup> and Rule 19b-4(f)(6) thereunder.<sup>70</sup>

Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file a proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement. Furthermore, a proposed rule change filed pursuant to Rule 19b-4(f)(6) under the Act<sup>71</sup> normally does not become operative for 30 days after the date of its filing. However, Rule 19b-4(f)(6)<sup>72</sup> permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.

The Exchange respectfully requests that the Commission waive the 30-day operative delay. Waiver of the operative delay is consistent with the protection of investors and the public interest because it will ensure fair competition among the exchanges by allowing the Exchange to amend the position and exercise limits for options on IBIT at the same time as ISE.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

**8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission**

The proposed rule change is based on the ISE Approval Order.<sup>73</sup>

**EXHIBIT 1**

SECURITIES AND EXCHANGE COMMISSION  
(Release No. 34- ; File No. SR-MIAX-2025-37)

August\_\_, 2025

Self-Regulatory Organizations: Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by Miami International Securities Exchange, LLC to Amend Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits to Allow the Exchange to Increase the Position and Exercise Limits for iShares Bitcoin Trust ETF

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on August\_\_, 2025, Miami International Securities Exchange, LLC (“MIAX” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits to increase the position and exercise limits for iShares Bitcoin Trust ETF (“IBIT”).

The text of the proposed rule change is available on the Exchange’s website at <https://www.miaxglobal.com/markets/us-options/miax-options/rule-filings>, and at MIAX’s principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits,<sup>3</sup> to permit IBIT to increase its position and exercise limits for options on IBIT from 25,000 contracts by removing IBIT from Interpretation and Policy .01 to Exchange Rule 307 and Interpretation and Policy .01 to Exchange Rule 309. This is a competitive filing based on a similar proposal submitted by Nasdaq ISE, LLC (“ISE”) and approved by the Securities and Exchange Commission (“Commission”).<sup>4</sup>

IBIT is an Exchange-Traded Funds (“ETF”) that holds bitcoin and is listed on the Nasdaq Stock Market LLC.<sup>5</sup> In November 2024, the Exchange received approval to list options on IBIT.<sup>6</sup> The position and exercise limits for IBIT options are 25,000 contracts as stated in

---

<sup>3</sup> The Exchange notes that all the rules of Chapter III of MIA X, including Rules 307 and 309, are incorporated by reference into the rulebooks of MIA X Emerald, LLC, MIA X Pearl, LLC and MIA X Sapphire, LLC.

<sup>4</sup> See Securities Exchange Act Release No. 103564 (July 29, 2025) (SR-ISE-2024-62) (Self-Regulatory Organizations; Nasdaq ISE, LLC; Order Approving a Proposed Rule Change, as Modified by Amendment Nos. 2 and 3, Regarding Position and Exercise Limits for Options on the iShares Bitcoin Trust ETF)(“ISE Approval Order”).

<sup>5</sup> Nasdaq received approval to list and trade Bitcoin-Based Commodity-Based Trust Shares in IBIT pursuant to Rule 5711(d) of Nasdaq. See Securities Exchange Act Release No. 99306 (January 10, 2024), 89 FR 3008 (January 17, 2024) (SR-NASDAQ-2023-016) (Order Granting Accelerated Approval of Proposed Rule Changes, as Modified by Amendments Thereto, To List and Trade Bitcoin-Based Commodity-Based Trust Shares and Trust Units). IBIT started trading on January 11, 2024.

<sup>6</sup> See Securities Exchange Act Release No. 101698 (November 21, 2024), 89 FR 93802 (November 27, 2024) (SR-MIA X-2024-40) (Self-Regulatory Organizations; MIA X Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 402, Criteria for Underlying Securities, Exchange Rule 307, Position Limits, and Exchange Rule 309, Exercise Limits To

Interpretation and Policy .01 to Exchange Rule 307, Position Limits, and Interpretation and Policy .01 to Exchange Rule 309, Exercise Limits the lowest limit available in options.<sup>7</sup>

Per the Commission “rules regarding position and exercise limits are intended to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options positions.”<sup>8</sup> For this reason, the Commission requires that “position and exercise limits must be sufficient to prevent investors from disrupting the market for the underlying security by acquiring and exercising a number of options contracts disproportionate to the deliverable supply and average trading volume of the underlying security.”<sup>9</sup> Based on its review of the data and analysis provided by the Exchange, the Commission concluded that the 25,000 contract position limit for IBIT options satisfied these objectives.<sup>10</sup>

While the Exchange proposed an aggregated 25,000 contract position limit for IBIT options in its IBIT Approval Order, it nonetheless believed that evidence existed to support a much higher position limit. Specifically, the Commission has considered and reviewed the Exchange’s analysis and ISE’s analysis as it was presented by the Exchange in the IBIT Approval Order that the exercisable risk associated with a position limit of 25,000 contracts represented only 0.4% of the outstanding shares of IBIT.<sup>11</sup> The Commission also has considered and reviewed the Exchange’s statement its IBIT Approval Order that with a position limit of

Allow the Exchange To List and Trade Options on the iShares Bitcoin Trust (the “Trust”)(“IBIT Approval Order”). The Exchange began trading IBIT options on November 20, 2024.

<sup>7</sup> Options on Fidelity Wise Origin Bitcoin Fund, ARK 21Shares Bitcoin ETF, Grayscale Bitcoin Trust (BTC), Grayscale Bitcoin Mini Trust BTC, and Bitwise Bitcoin ETF are also subject to a 25,000 contract position and exercise limit.

<sup>8</sup> See supra note 6, IBIT Approval Order, 89 FR 78946.

<sup>9</sup> See id.

<sup>10</sup> See id.

<sup>11</sup> See id. Data represents figures from August 12, 2024.

25,000 contracts on the same side of the market and 611,040,000 shares of IBIT outstanding, 244 market participants would have to simultaneously exercise their positions to place IBIT under stress.<sup>12</sup> Based on the Commission's review of this information and analysis, the Commission concluded that the proposed position and exercise limits of 25,000 contracts were designed to prevent investors from disrupting the market for the underlying security by acquiring and exercising a number of options contracts disproportionate to the deliverable supply and average trading volume of the underlying security, and to prevent the establishment of options positions that can be used or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position.<sup>13</sup>

IBIT currently qualifies for a 250,000 contract position limit pursuant to the criteria in Exchange Rule 307(d)(5), which requires that, for the most recent six-month period, trading volume for the underlying security be at least 100 million shares.<sup>14</sup> As of November 25, 2024, the market capitalization for IBIT was \$46,783,480,800<sup>15</sup> with an average daily volume ("ADV"), for the preceding three months prior to November 25, 2024, of 39,421,877 shares. IBIT is well above the requisite minimum of 100 million shares necessary to qualify for the 250,000 contract position limit. Also, as of November 25, 2024, there are 19,787,762 bitcoins in circulation.<sup>16</sup> According to calculations done by ISE as presented in Amendment No. 2,<sup>17</sup> at a

---

<sup>12</sup> See id. Data represents figures from August 12, 2024.

<sup>13</sup> See id.

<sup>14</sup> Exchange Rule 307, Position Limits, provides at subparagraph (d)(5) that to be eligible for the 250,000 contract limit, either the most recent six(6) month trading volume of the underlying security must have totaled at least 100 million shares or the most recent six(6) month trading volume of the underlying security must have totaled at least seventy-five (75) million shares and the underlying security must have at least 300 million shares currently outstanding.

<sup>15</sup> The market capitalization was determined by multiplying a settlement price of (\$54.02) by the number of shares outstanding (866,040,000). This figure was acquired as of November 25, 2024. See <https://www.ishares.com/us/products/333011/ishares-bitcoin-trust-etf>.

<sup>16</sup> See <https://www.coingecko.com/en/coins/bitcoin>.

<sup>17</sup> See Amendment No. 2 to Proposed Rule Change to modify the position and exercise limits for IBIT options to the applicable position and exercise limits as determined by Options 9, Sections 13 and 15 (SR-

price of \$94,830,<sup>18</sup> that equates to a market capitalization of greater than \$1.876 trillion US. If a position limit of 250,000 contracts were considered, the exercisable risk would represent 2.89%<sup>19</sup> of the outstanding shares outstanding of IBIT. Given IBIT's liquidity, the current 25,000 position limit is extremely conservative.

Position limits, and exercise limits, are designed to limit the number of options contracts traded on the exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. These limits, which are described in Exchange Rules 307 and 309, are intended to address potential manipulative schemes and adverse market impacts surrounding the use of options, such as disrupting the market in the security underlying the options. Position and exercise limits must balance concerns regarding mitigating potential manipulation and the cost of inhibiting potential hedging activity that could be used for legitimate economic purposes.

To achieve this balance, the Exchange proposes to remove IBIT from the table of position limits in Interpretation and Policy .01 to Exchange Rule 307 as well as the table of exercise limits in Interpretation and Policy .01 to Exchange Rule 309 so that options on IBIT may trade similar to all other options for which the Exchange has not filed to otherwise increase the position limits to levels outside of the limits of Exchange Rule 307(d). As a result of removing IBIT from the aforementioned tables, it would increase the position and exercise limits for options on IBIT from 25,000 to 250,000 contracts based on the parameters of Exchange Rule 307(d). By removing IBIT from the aforementioned tables, IBIT would be subject to subsequent

ISE-2024-62), filed Mar. 26, 2025, available at <https://www.sec.gov/comments/srise-2024-62/srise202462-593575-1721782.pdf>. ("Amendment No. 2").

<sup>18</sup> This is the approximate price of bitcoin from 4:00pm ET on November 25, 2024.

<sup>19</sup> This percentage is arrived at with this equation:  $(250,000 \text{ contract limit} * 100 \text{ shares per option} / 866,040,000 \text{ shares outstanding})$ .

six (6) month reviews to determine future position and exercise limits similar to all other options subject to Exchange Rules 307 and 309.

In addition to IBIT's Exchange Rule 307(d) eligibility for 250,000 contracts, the Exchange performed additional analysis relying on data presented in Amendment No.2, with respect to IBIT. First, in Amendment No. 2, ISE considered IBIT's market capitalization and ADV, and prospective position limit in relation to other securities. In measuring IBIT against other securities, ISE aggregated market capitalization and volume data for securities that have defined position limits utilizing data from The Options Clearing Corporations ("OCC").<sup>20</sup> This pool of data took into consideration 3,897 options on single stock securities, excluding broad based ETFs.<sup>21</sup> Next, ISE aggregated the data based on market capitalization and ADV and grouped option symbols by position limit utilizing statistical thresholds for ADV, based on ninety days, and market capitalization that were one standard deviation above the mean for each position limit category (i.e. 25,000, 50,000 to 65,000, 75,000, 100,000 to less than 250,000, and 250,000).<sup>22</sup> Exchange Rule 307(d) sets out position limits for various contracts. For example, on ISE like on the Exchange, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. ISE performed an exercise to demonstrate IBIT's position limit relative to other options symbols in terms of market

---

<sup>20</sup> The computations are based on OCC data from November 25, 2024. Data displaying zero values in market capitalization or ADV were removed.

<sup>21</sup> IBIT has one asset and therefore is not comparable to a broad based ETF where there are typically multiple components.

<sup>22</sup> Exchange Rule 307 sets out position limits for various contracts. For example, a 25,000 contract limit applies to those options having an underlying security that does not meet the requirements for a higher options contract limit. The Exchange notes that position limits may also be higher due to corporate actions in the underlying equities, such as a stock split. See <https://www.theocc.com/market-data/market-data-reports/series-and-trading> data/position-limits. As a result, the Exchange's pool of data considered higher position limits than 250,000 contracts, where applicable.

capitalization and ADV. For reference the market capitalization for IBIT was \$46,783,480,800<sup>23</sup> with an ADV, for the preceding three months prior to November 25, 2024, of 39,421,877 shares.<sup>24</sup>

<b>rank</b>	<b>%</b>	<b>%</b>	<b>%</b>	<b>%</b>			

Based on the above table, as presented in Amendment No. 2,<sup>25</sup> if IBIT were compared to the 1,934 stocks that have position limits of 250,000 contracts to less than 500,000 contracts it would rank in the 88th percentile for market capitalization and the 99th percentile for ADV.

ISE, in Amendment No. 2, also analyzed the position limits for IBIT by regressing the market capitalization figures and 90-day ADV of all non-ETF equities, against their respective position limit figures.<sup>26</sup> From this regression, ISE was able to determine the implied coefficients to create a formulaic method for determining an appropriate position limit.<sup>27</sup> In this case, the modeled position limit is 565,796 contracts.<sup>28</sup> The results of ISE's study are below.

Based on the aforementioned analysis, as performed by ISE in Amendment No. 2, the Exchange believes that the proposed 250,000 contracts for position and exercise limits is appropriate.

Second, ISE reviewed IBIT's data relative to the market capitalization of the entire bitcoin market in terms of exercise risk and availability of deliverables. As of November 25, 2024, there are 19,787,762 bitcoins in circulation.<sup>29</sup> At a price of \$94,830,<sup>30</sup> that equates to a

<sup>29</sup> See <https://www.coingecko.com/en/coins/bitcoin>.

<sup>30</sup> This is the approximate price of bitcoin from 4:00pm ET on November 25, 2024.

market capitalization of greater than \$1.876 trillion US. If a position limit of 250,000 contracts were considered, the exercisable risk would represent 2.89%<sup>31</sup> of the outstanding shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer, additionally it can be compared the position limit sought to the total market capitalization of the entire bitcoin market and in that case, the exercisable risk for options on IBIT would be less than 0.072% of all bitcoin outstanding. Assuming a scenario where all options on IBIT shares were exercised given the proposed 250,000 per same side position and exercise limits, this would have a virtually unnoticed impact on the entire bitcoin market. This analysis demonstrates that the proposed 250,000 per same side position and exercise limits are appropriate for options on IBIT given its liquidity.

Third, ISE reviewed the proposed position limit by comparing it to position limits for derivative products regulated by the Commodity Futures Trading Commission (“CFTC”). While the CFTC, through the relevant Designated Contract Markets, only regulates options positions based upon delta equivalents (creating a less stringent standard), ISE examined equivalent bitcoin futures position limits. In particular, ISE looked at the CME bitcoin futures contract<sup>32</sup> that has a position limit of 2,000 futures.<sup>33</sup> On October 22, 2024, CME bitcoin futures settled at \$94,945.<sup>34</sup> On October 22, 2024, IBIT settled at \$54.02, which would equate to greater than 17,557,898 shares of IBIT if the CME notional position limit was utilized. Since substantial portions of any distributed options portfolio are likely to be out of the money on expiration, an

---

<sup>31</sup> This percentage is arrived at with this equation:  $(250,000 \text{ contract limit} * 100 \text{ shares per option} / 866,040,000 \text{ shares outstanding})$ .

<sup>32</sup> CME Bitcoin Futures are described in Chapter 350 of CME’s Rulebook.

<sup>33</sup> See the Position Accountability and Reportable Level Table in the Interpretations & Special Notices Section of Chapter 5 of CME’s Rulebook.

<sup>34</sup> 2,000 futures at a 5 bitcoin multiplier (per the contract specifications) equates to \$949,450,000 (2000 contracts \* 5 BTC per contract \* \$94,945 price of November BTC future) of notional value.

options position limit equivalent to the CME position limit for bitcoin futures (considering that all options deltas are  $\leq 1.00$ ) should be a bit higher than the CME implied 175,578 limit. Of note, unlike options contracts, CME position limits are calculated on a net futures equivalent basis by contract and include contracts that aggregate into one or more base contracts according to an aggregation ratio(s).<sup>35</sup> Therefore, if a portfolio includes positions in options on futures, CME would aggregate those positions into the underlying futures contracts in accordance with a table published by CME on a delta equivalent value for the relevant spot month, subsequent spot month, single month and all month position limits.<sup>36</sup> If a position exceeds position limits because of an option assignment, CME permits market participants to liquidate the excess position within one business day without being considered in violation of its rules. Additionally, if at the close of trading, a position that includes options exceeds position limits for futures contracts, when evaluated using the delta factors as of that day's close of trading, but does not exceed the limits when evaluated using the previous day's delta factors, then the position shall not constitute a position limit violation. Based on the aforementioned analysis, the Exchange believes that the proposed 250,000 contracts for position and exercise limits is appropriate.

Fourth, ISE analyzed a position and exercise limit of 250,000 for IBIT options against other options on ETFs with an underlying commodity, namely SPDR Gold Shares ("GLD") ETF, iShares Silver Trust ("SLV") ETF, and ProShares Bitcoin ETF ("BITO").<sup>37</sup> GLD has a float of 306.1 million shares<sup>38</sup> and a position limit of 250,000 contract. SLV has a float of 520.7 million

---

<sup>35</sup> See <https://www.cmegroup.com/education/courses/market-regulation/position-limits/positionlimits-aggregation-of-contracts-and-table.htm>.

<sup>36</sup> Id.

<sup>37</sup> GLD, SLV and BITO each hold one asset in trusts similar to IBIT.

<sup>38</sup> See <https://www.ssga.com/us/en/intermediary/etfs/spdr-gold-shares-gld>.

shares,<sup>39</sup> and a position limit of 250,000 contracts. Finally, BITO has 107.65 million shares outstanding<sup>40</sup> and a position limit of 250,000 contracts. As previously noted, position and exercise limits are designed to limit the number of options contracts traded on the exchange in an underlying security that an investor, acting alone or in concert with others directly or indirectly, may control. A position limit exercise in GLD would represent 8.17% of the float of GLD; a position limit exercise in SLV would represent 4.8% of the float of SLV, and a position limit exercise of BITO would represent 23.22% of the float of BITO. In comparison, a 250,000 contract position limit in IBIT would represent 2.89% of the float of IBIT. Consequently, the 250,000 proposed IBIT options position and exercise limit is more conservative than the standard applied to GLD, SLV and BITO, and appropriate. Additionally, the Exchange notes that the Cboe Bitcoin U.S. ETF Index Options (CBTX) and the Cboe Mini Bitcoin U.S. ETF Index Options (MBTX),<sup>41</sup> which trade exclusively on Cboe, are comprised of multiple bitcoin ETFs of which IBIT is the highest weighted (at 20%) in the index composition.<sup>42</sup> These indices currently trade pursuant to a 24,000 contract position and exercise limit.<sup>43</sup>

Fifth, the Exchange and ISE note that IBIT began trading in penny increments as of

---

<sup>39</sup> See <https://www.ishares.com/us/products/239855/ishares-silver-trust-fund>.

<sup>40</sup> See <https://www.marketwatch.com/investing/fund/bito>.

<sup>41</sup> MBTX is based on 1/10th the value of the Cboe Bitcoin U.S. ETF Index.

<sup>42</sup> See [https://www.cboe.com/tradable\\_products/bitcoin-etf-indexoptions?utm\\_source=mcae&utm\\_medium=email&utm\\_campaign=bitcoin\\_eft\\_options\\_launch](https://www.cboe.com/tradable_products/bitcoin-etf-indexoptions?utm_source=mcae&utm_medium=email&utm_campaign=bitcoin_eft_options_launch). Cboe's website provides a product comparison chart indicating that CBTX and MBTX are permitted to trade FLEX as compared to spot bitcoin ETF options. See [https://cdn.cboe.com/resources/membership/Cboe\\_Bitcoin\\_US ETF\\_Options\\_Comparative\\_Overview.pdf?\\_gl=1\\*1xmn04c\\*\\_up\\*MQ..\\*\\_ga\\*MTc0MjU1NzU1Ni4xNzM0NTU2NTky\\*\\_ga\\_5Q99WB9X71\\*MTczNDU1NjU5MC4xLjAuMTczNDU1NjU5MC4wLjAuMA](https://cdn.cboe.com/resources/membership/Cboe_Bitcoin_US ETF_Options_Comparative_Overview.pdf?_gl=1*1xmn04c*_up*MQ..*_ga*MTc0MjU1NzU1Ni4xNzM0NTU2NTky*_ga_5Q99WB9X71*MTczNDU1NjU5MC4xLjAuMTczNDU1NjU5MC4wLjAuMA).

<sup>43</sup> See Cboe Rule 8.32(a). The Exchange notes that given the multiplier and notional value of CBTX, the index has a position and exercise limit that equates to 1,000,000 contracts of in kind exposure to IBIT, which is more than 40 times greater than the exposure for options on IBIT at the current 25,000 contract position and exercise limit.

January 2, 2025 pursuant to the Penny Interval Program.<sup>44</sup> The Commission noted that evidence contained in both the Exchanges' Report and the Cornerstone analysis demonstrates that the Penny Pilot has benefitted investors and other market participants in the form of narrower spreads.<sup>45</sup> The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests). As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class that experience a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.<sup>46</sup> IBIT options are among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments. Failing to increase position and exercise limits for IBIT options, now that it is trading in finer increments, may artificially inhibit liquidity and create price inefficiency.

The Exchange believes that IBIT options has demonstrated that it has more than sufficient liquidity to garner an increased position and exercise limit of 250,000 contracts. The Exchange believes that any concerns related to manipulation and protection of investors are

---

<sup>44</sup> The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Exchange Rule 501(c)(2). The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Exchange Rule 501(c)(2). See Exchange Rule 501(c)(2).

<sup>45</sup> See Securities Exchange Act Release No. 88532 (April 1, 2020), 67 FR 19545, 19548 (April 7, 2020) (File No. 4-443) (Joint Industry Plan; Order Approving Amendment No. 5 to the Plan for the Purpose of Developing and Implementing Procedures Designed To Facilitate the Listing and Trading of Standardized Options To Adopt a Penny Interval Program) ("Penny Approval Order").

<sup>46</sup> Id. at 19548.

mollified by the significant liquidity provision in IBIT. The Exchange states that, as a general principle, increases in active trading volume and deep liquidity of the underlying securities do not lead to manipulation and/or disruption.

The Exchange believes that increasing the position (and exercise) limits for IBIT options would lead to a more liquid and competitive market environment for IBIT options, which will benefit customers that trade these options. Further, the reporting requirement for such options would remain unchanged. Thus, the Exchange will still require that each member organization that maintains positions in impacted options on the same side of the market, for its own account or for the account of a customer, report certain information to the Exchange. This information includes, but would not be limited to, the options' positions, whether such positions are hedged and, if so, a description of the hedge(s). Market-Makers<sup>47</sup> would continue to be exempt from this reporting requirement, however, the Exchange may access Market-Maker position information.<sup>48</sup> Moreover, the Exchange's requirement that member organizations file reports with the Exchange for any customer who held aggregate large long or short positions on the same side of the market of 200 or more option contracts of any single class for the previous day will remain at this level and will continue to serve as an important part of the Exchange's surveillance efforts.<sup>49</sup>

The Exchange also has no reason to believe that the growth in trading volume in IBIT will not continue. Rather, the Exchange expects continued options volume growth in IBIT as

---

<sup>47</sup> Market Makers refers to "Lead Market Makers," "Primary Lead Market Makers," and "Registered Market Makers" collectively. See Exchanged Rule 100.

<sup>48</sup> The Options Clearing Corporation ("OCC") through the Large option Position Reporting ("LOPR") system acts as a centralized service provider for Member compliance with position reporting requirements by collecting data from each Member or Member organization, consolidating the information, and ultimately providing detailed listings of each Member's report to the Exchange, as well as Financial Industry Regulatory Authority, Inc. ("FINRA"), acting as its agent pursuant to a regulatory services agreement ("RSA"). Member means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed "members" under the Exchange Act. See Exchanged Rule 100.

<sup>49</sup> See Exchanged Rule 310.

opportunities for investors to participate in the options markets increase and evolve. The Exchange believes that the current position and exercise limits in IBIT options are restrictive and will hamper the listed options markets from being able to compete fairly and effectively with the over-the-counter (“OTC”) markets. OTC transactions occur through bilateral agreements, the terms of which are not publicly disclosed to the marketplace. As such, OTC transactions do not contribute to the price discovery process on a public exchange or other lit markets. The Exchange believes that without the proposed changes to position and exercise limits for IBIT options, market participants will find the 25,000 contract position limit an impediment to their business and investment objectives as well as an impediment to efficient pricing. As such, market participants may find the less transparent OTC markets a more attractive alternative to achieve their investment and hedging objectives, leading to a retreat from the listed options markets, where trades are subject to reporting requirements and daily surveillance. However, the Exchange notes that IBIT’s position limits would be reviewed on a six month basis, pursuant to Exchange Rule 307(d), similar to other options.

The Exchange represents that the same surveillance procedures applicable to all other options on other ETFs currently listed and traded on the Exchange will apply to options on the Trust. Also the Exchange represents that it has the necessary systems capacity to support the new option series. The Exchange believes that its existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior which might potentially arise from listing and trading options on ETFs, including the proposed Trust options.

The Exchange believes that the existing surveillance procedures and reporting requirements at the Exchange are capable of properly identifying disruptive and/or manipulative trading activity. The Exchange also represents that it has adequate surveillances in place to detect potential manipulation, as well as reviews in place to identify continued compliance with the

Exchange's listing standards. These procedures monitor market activity via automated surveillance techniques to identify unusual activity in both options and the underlyings, as applicable. The Exchange also notes that large stock holdings must be disclosed to the Commission by way of Schedules 13D or 13G,<sup>50</sup> which are used to report ownership of stock which exceeds 5% of a company's total stock issue and may assist in providing information in monitoring for any potential manipulative schemes. Further, the Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in equity options. Current margin and risk-based haircut methodologies serve to limit the size of positions maintained by any one account by increasing the margin and/or capital that a member organization must maintain for a large position held by itself or by its customer.<sup>51</sup> In addition, Rule 15c3-1<sup>52</sup> imposes a capital charge on member organizations to the extent of any margin deficiency resulting from the higher margin requirement.

## 2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.<sup>53</sup> Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)<sup>54</sup> requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing,

---

<sup>50</sup> 17 CFR 240.13d-1.

<sup>51</sup> See Exchange Rules, Chapter 15, Margins.

<sup>52</sup> 17 CFR 240.15c3-1.

<sup>53</sup> 15 U.S.C. 78f(b).

<sup>54</sup> 15 U.S.C. 78f(b)(5).

settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section (6)(b)(5)<sup>55</sup> requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that removing IBIT from the table of position limits in Interpretation and Policy .01 to Exchange Rule 307 and the table of exercise limits in Interpretation and Policy .01 to Exchange Rule 309, so its position limit would be reviewed similar to all other options for which the Exchange has not filed to otherwise establish the position limits to levels outside of the position limits of Exchange Rule 307(d) is consistent with the Act. This proposal will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest, because it will provide market participants with the ability to more effectively execute their trading and hedging activities. Also, based on current trading volume, the resulting increase in the position (and exercise) limits for IBIT options may allow Market-Makers to maintain their liquidity in these options in amounts commensurate with the continued high consumer demand in IBIT options. Subjecting options on IBIT to the position limits in Exchange Rule 307(d) and corresponding exercise limits in Exchange Rule 309 may also encourage other liquidity providers to continue to trade on the Exchange rather than shift their volume to OTC markets, which will enhance the process of price discovery conducted on the Exchange through increased order flow. Further, this proposed change would allow institutional investors to utilize IBIT

---

<sup>55</sup> Id.

options for prudent risk management purposes. The Exchange notes that IBIT's position limits would be reviewed on a six month basis, pursuant to Exchange Rule 307(d), similar to other options.

In addition, the Exchange believes that the current liquidity in IBIT will mitigate concerns regarding potential manipulation of IBIT options and/or disruption of IBIT upon amending the table of position limits in Interpretation and Policy .01 to Exchange Rule 307 and the table of exercise limits in Interpretation and Policy .01 to Exchange Rule 309.

Additionally, the regression model performed by ISE demonstrates that the proposed position limit is half of the modeled limit given the liquidity of IBIT. Comparing IBIT's data relative to the market capitalization of the entire bitcoin market in terms of exercise risk and availability of deliverables, the Exchange was able to conclude that if a position limit of 250,000 contracts were considered, the exercisable risk would represent 2.89%<sup>56</sup> of the shares outstanding of IBIT. Since IBIT has a creation and redemption process managed through the issuer (whereby Bitcoin is used to create IBIT shares), the position limit can be compared to the total market capitalization of the entire bitcoin market and in that case, the exercisable risk for options on IBIT would represent less than .072% of all bitcoin outstanding.<sup>57</sup> Comparing the proposed position limit to position limits for equivalent bitcoin futures position limits, the analysis demonstrated that a 250,000 contracts position and exercise limits would be appropriate.

Comparing a position limit of 250,000 for IBIT options against other options on ETFs with an underlying commodity, namely GLD, SLV and BITO, a position limit exercise in GLD represents 8.17% of the float of GLD, a position limit exercise in SLV represents 4.8% of the

---

<sup>56</sup> This percentage is arrived at with this equation:  $(250,000 \text{ contract limit} * 100 \text{ shares per option} / 866,040,000 \text{ shares outstanding})$ .

<sup>57</sup> This number was arrived at with this calculation:  $((250,000 \text{ limit} * 100 \text{ shares per option} * \$54.02 \text{ settle}) / (19,787,762 \text{ BTC outstanding} * \$94,830 \text{ BTC price}))$ .

float of SLV, and a position limit exercise of BITO represents 23.22% of the float of BITO. In comparison, a 250,000 contract position limit in IBIT options would represent 2.89% of the float of IBIT. Consequently, a 250,000 IBIT options position limit is more conservative than the standard applied to GLD, SLV and BITO, and appropriate. Also, the Exchange notes that Cboe's proprietary CBTX and MBTX indices weight IBIT the highest (at 20%) in its index composition among the other ETFs that comprise the index.<sup>58</sup> The Exchange notes that today, these indexes have a position of 24,000 contracts which is much higher than the current position limits for IBIT options when considering the notional value of the indices.<sup>59</sup> These indexes are already trading with position and exercise limits that are higher than the lowest position limit for an industry index option.<sup>60</sup>

The Exchange notes that IBIT began trading in penny increments as of January 2, 2025 pursuant to the Penny Interval Program.<sup>61</sup> The Commission noted that evidence contained in

---

<sup>58</sup> See [https://www.cboe.com/tradable\\_products/bitcoin-etf-indexoptions?utm\\_source=mcae&utm\\_medium=email&utm\\_campaign=bitcoin\\_eft\\_options\\_launch](https://www.cboe.com/tradable_products/bitcoin-etf-indexoptions?utm_source=mcae&utm_medium=email&utm_campaign=bitcoin_eft_options_launch).

<sup>59</sup> See Cboe Rule 8.32(a). The Exchange notes that given the multiplier and notional value of CBTX, the index has a position and exercise limit that equates to 1,000,000 contracts of in kind exposure to IBIT, which is more than 40 times greater than the exposure for options on IBIT at the current 25,000 contract position and exercise limit.

<sup>60</sup> 18,000 contracts is the lowest position limit for industry index options if the Exchange determines, at the time of a review conducted pursuant to subparagraph (2) of this paragraph (a), that any single underlying stock accounted, on average, for thirty percent (30%) or more of the index value during the thirty (30)-day period immediately preceding the review. See Exchange Rule 1805. Further, Cboe Rule 8.32(a)(3) permits a limit of 31,500 contracts if the Exchange determines that the conditions specified in Rule 8.32(a)(1) and (2), which would require the establishment of a lower limit, have not occurred.

<sup>61</sup> The Exchange may add to the Penny Program a newly listed option class provided that (i) it is among the 300 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in its first full calendar month of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the month after it qualifies and will remain in the Penny Program for one full calendar year, after which it will be subject to the Annual Review described in Exchange Rule 501(c)(2). The Exchange may add any option class to the Penny Program, provided that (i) it is among the 75 most actively traded multiply listed option classes, as ranked by National Cleared Volume at OCC, in the past six full calendar months of trading and (ii) the underlying security is priced below \$200 or the underlying index is at an index level below \$200. Any option class added under this provision will be added on the first trading day of the second full month after it qualifies and will remain in the Penny Program for the rest of the calendar year, after which it will be subject to the Annual Review as described in Exchange Rule 501(c)(2). See Exchange Rule 501(c)(2).

both the Exchanges' Report and the Cornerstone analysis demonstrates that the Penny Pilot has benefitted investors and other market participants in the form of narrower spreads.<sup>62</sup> The most actively traded options classes are included in the Penny Program based on certain objective criteria (trading volume thresholds and initial price tests). As noted in the Penny Approval Order, the Penny Program reflects a certain level of trading interest (either because the class is newly listed or a class that experience a significant growth in investor interest) to quote in finer trading increments, which in turn should benefit market participants by reducing the cost of trading such options.<sup>63</sup> IBIT options are among a select group of products that have achieved a certain level of liquidity that have garnered it the ability to trade in finer increments pursuant to the Penny Interval Program. Failing to permit IBIT options to potentially increase position and exercise limits given the trading in finer increments, may artificially inhibit liquidity and create price inefficiency for IBIT options.

Finally, as discussed above, the Exchange's surveillance and reporting safeguards continue to be designed to deter and detect possible manipulative behavior that might arise from increasing or eliminating position and exercise limits in certain classes. The Exchange believes that the current financial requirements imposed by the Exchange and by the Commission adequately address concerns regarding potentially large, unhedged positions in the options on the underlying securities, further promoting just and equitable principles of trading, the maintenance of a fair and orderly market, and the protection of investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to filings submitted by ISE.<sup>64</sup>

The Exchange's proposal does not burden intra-market competition because all Members would be subject to the position limits in Exchange Rule 307(d) and corresponding exercise limits in Exchange Rule 309. The Exchange believes that the proposed rule change will also provide additional opportunities for market participants to continue to efficiently achieve their investment and trading objectives for equity options on the Exchange.

The Exchange does not believe that the proposed rule change will impose any burden on inter-market competition as the proposal is not competitive in nature. The Exchange expects that all option exchanges will adopt substantively similar proposals, such that the Exchange's proposal would benefit competition. For these reasons, the Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the

---

<sup>64</sup> See supra note 4.

Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act<sup>65</sup> and Rule 19b-4(f)(6)<sup>66</sup> thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

##### Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include file number SR-MIAX-2025-37 on the subject line.

##### Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

---

<sup>65</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>66</sup> 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

All submissions should refer to file number SR-MIAX-2025-37. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-MIAX-2025-37 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>67</sup>
