

personnel rules and practices of the ACRS.]

3:30 p.m.–6 p.m.: *Preparation of Reports (Open/Closed)*—The Committee will continue its discussion of proposed ACRS reports. [Note: Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

Friday, March 3, 2023

1 p.m.–6 p.m.: *Preparation of Reports (Open/Closed)*—The Committee will continue its discussion of proposed ACRS reports. [Note: Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on June 13, 2019 (84 FR 27662). In accordance with those procedures, oral or written views may be presented by members of the public, including representatives of the nuclear industry. Persons desiring to make oral statements should notify Quynh Nguyen, Cognizant ACRS Staff and the Designated Federal Officer (DFO) (Telephone: 301-415-5844, Email: Quynh.Nguyen@nrc.gov), 5 days before the meeting, if possible, so that appropriate arrangements can be made to allow necessary time during the meeting for such statements. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the cognizant ACRS staff if such rescheduling would result in major inconvenience.

An electronic copy of each presentation should be emailed to the cognizant ACRS staff at least one day before the meeting.

In accordance with Subsection 10(d) of Public Law 92-463 and 5 U.S.C. 552b(c), certain portions of this meeting may be closed, as specifically noted above. Use of still, motion picture, and television cameras during the meeting may be limited to selected portions of the meeting as determined by the Chairman. Electronic recordings will be permitted only during the open portions of the meeting.

ACRS meeting agendas, meeting transcripts, and letter reports are available through the NRC Public Document Room (PDR) at pdr.resource@nrc.gov, or by calling the PDR at 1-800-397-4209, or from the Publicly Available Records System component of NRC's Agencywide Documents Access and Management System, which is

accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html> or <http://www.nrc.gov/reading-rm/doc-collections/#ACRS/>.

Dated: February 8, 2023.

Russell E. Chazell,

Federal Advisory Committee Management Officer, Office of the Secretary.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-445-LR and 50-446-LR; ASLBP No. 23-978-01-LR-BD01]

Establishment of Atomic Safety and Licensing Board; Vistra Operations Company LLC

Pursuant to the Commission's regulations, *see, e.g.*, 10 CFR 2.104, 2.105, 2.300, 2.309, 2.313, 2.318, 2.321, notice is hereby given that an Atomic Safety and Licensing Board (Board) is being established to preside over the following proceeding:

Vistra Operations Company LLC,
(Comanche Peak Nuclear Power Plant, Units 1 and 2)

This proceeding involves an application seeking a twenty-year license renewal of Facility Operating License Nos. NPF-87 and NPF-89, which currently authorize Vistra Operations Company LLC to operate Comanche Peak Nuclear Power Plant, Units 1 and 2, until, respectively, February 8, 2030, and February 2, 2033. In response to a notice published in the **Federal Register** announcing the opportunity to request a hearing, *see* 87 FR 73,798 (Dec. 1, 2022), a hearing request was filed on January 30, 2023, on behalf of the Citizens for Fair Utility Regulation.

The Board is comprised of the following Administrative Judges:

- G. Paul Bollwerk, III, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001
- Dr. Sue H. Abreu, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001
- Dr. Gary S. Arnold, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001

All correspondence, documents, and other materials shall be filed in accordance with the NRC E-Filing rule. *See* 10 CFR 2.302.

Dated: February 7, 2023.

Edward R. Hawkens,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-96837; File No. SR-PEARL-2023-01]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 531, Reports and Market Data Products, To Provide for the New "Liquidity Taker Event Report—Resting Simple Orders"

February 8, 2023.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on January 25, 2023, MIAX PEARL, LLC ("MIAX Pearl" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rule 531 to provide for the new "Liquidity Taker Event Report—Resting Simple Orders".

The text of the proposed rule change is available on the Exchange's website at <http://www.miaxoptions.com/rule-filings/pearl> at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 531 to provide for the new "Liquidity Taker Event Report—Resting Simple Orders" (the "Report").³ The proposed Report will be an optional product⁴ available to Members.⁵ Currently, the Exchange provides two types of Liquidity Taker Event Reports, one including information about incoming orders seeking to remove liquidity from the Simple Order Book⁶ described under Exchange Rule 531(a), and a second including the same information but about incoming Complex Orders that seek to remove Complex Orders resting on the Strategy Book⁷ described under Exchange Rule 531(b). Both of these existing reports provide data for executions and contra-side responses that occurred within 200 microseconds of the time the resting order was received by the Exchange. But for the modified timeframe and one difference described below, the proposed Report would include the same data as the Liquidity Taker Event Report for Simple Orders but would focus on executions and contra-side responses that occurred after 200 microseconds of the time the resting order was received by the Exchange and within 200 microseconds of receipt of the first attempt to execute against the

resting order after the initial 200 microsecond time period has expired as described further below.

Like for the existing reports, the Exchange believes the additional data points from the matching engine outlined below for the proposed Report may also help Members gain a better understanding about their interactions with the Exchange. The Exchange believes the proposed Report will provide Members with an opportunity to learn more about better opportunities to access liquidity and receive better execution rates. The proposed Report will increase transparency and democratize information so that all firms that subscribe to the Report have access to the same information on an equal basis, even for firms that do not have the appropriate resources to generate a similar report regarding interactions with the Exchange. Like the existing reports, none of the components of the proposed Report include real-time market data.

Members generally would use a liquidity accessing order if there is a high probability that it will execute against an order resting on the Simple Order Book. Like the existing reports, the proposed Report would identify by how much time an order that may have been marketable missed an execution but would focus on a later timeframe than the existing reports. The proposed Report will provide greater visibility into the missed trading execution, which will allow Members to optimize their models and trading patterns to yield better execution results.

Like the existing reports, the proposed Report will be a Member-specific report and will help Members to better understand by how much time a particular order missed executing against a specific resting order, thus allowing that Member to determine whether it wants to invest in the necessary resources and technology to mitigate missed executions against certain resting orders on the Simple Order Book. Like the existing reports, the Exchange proposes to provide the Report on a T+1 basis. As further described below, the proposed Report will be specific and tailored to the Member that is subscribed to the Report and any data included in the Report that relates to a Member other than the Member receiving the Report will be anonymized.

The Exchange proposes to provide the proposed Report in response to additional Member demand for data concerning the timeliness of their incoming orders and executions against certain resting orders that have been resting on the Simple Order Book for at

least 200 microseconds and within 200 microseconds of receipt of the first attempt to execute against the resting order after the initial 200 microsecond time period has expired. Certain Members that subscribe to the existing reports have requested the same information as the Simple Order report but for the later timeframe described herein so that they can better understand the timeliness of their incoming orders and efficacy of their attempts to execute against resting liquidity on the Exchange's Simple Order Book. The purpose of the proposed Report is to provide Members the necessary data in a standardized format on a T+1 basis to those that subscribe to the Report on an equal basis.

Proposed Exchange Rule 531(c) would provide that the Report is a daily report that provides a Member ("Recipient Member") with its liquidity response time details for executions of an order resting on the Book, where that Recipient Member attempted to execute against such resting order within an extended timeframe that meets certain criteria described below.⁸

Report Content

The content of the proposed Report is basically identical to that of the existing Liquidity Taker Event Report for Simple Orders described under Exchange Rule 531(a) with two differences. The first difference is the timeframe of the proposed Report mentioned above and described in more detail below. The second difference is that, unlike the existing Liquidity Taker Event Report for Simple Orders, the proposed Report would not include the time difference between the time the resting order was received by the Exchange and the time the first response that executes against the resting order was received by the Exchange. Each of these differences are described below. All other aspects of the proposed Report are identical to the existing Liquidity Taker Event Report for Simple Orders described under Exchange Rule 531(a).

Like current paragraph (a)(1) of Exchange Rule 531 for the existing Liquidity Taker Event Report for Simple Orders, proposed paragraph (c)(1) of Rule 531 would describe the content of the proposed Report and delineate which information would be provided regarding the resting order,⁹ the

⁸ The Exchange proposes to renumber current Exchange Rule 531(c), Market Data Products, as Exchange Rule 531(d). The Exchange does not propose to amend the rule text of this rule.

⁹ Only displayed orders will be included in the Report. The Exchange notes that it does not

³ The proposed rule change is identical to proposal to adopt the same report by the Exchange's affiliate, MIAX Emerald, LLC recently filed with the Commission for immediate effectiveness. See SR-EMERALD-2023-02 (filed January 18, 2023).

⁴ The Exchange intends to submit a separate filing with the Commission pursuant to Section 19(b)(1) to propose fees for the Liquidity Taker Event Report—Resting Simple Orders.

⁵ The term "Member" means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed "members" under the Exchange Act. See Exchange Rule 100.

⁶ The term "Simple Order Book" means "the Exchange's regular electronic book of orders and quotes." See Exchange Rule 518(a)(15).

⁷ The term "Complex Strategy" means "a particular combination of components and their ratios to one another. New complex strategies can be created as the result of the receipt of a complex order or by the Exchange for a complex strategy that is not currently in the System." See Exchange Rule 518(a)(6). The term "Strategy Book" means the Exchange's electronic book of complex orders and complex quotes. See Exchange Rule 518(a)(17). The Strategy Book is organized by Complex Strategy in that individual orders for a defined Complex Strategy are organized together in a book that is separate from the orders for a different Complex Strategy.

response that successfully executed against the resting order, and the response submitted by the Recipient Member that missed executing against the resting order. It is important to note that the content of the Report will be specific to the Recipient Member and the Report will not include any information related to any Member other than the Recipient Member, other than certain information about the resting order described below. The Exchange will restrict all other market participants, including the Recipient Member, from receiving another market participant's data.

Resting Order Information. Like current paragraph (a)(1)(i) of Exchange Rule 531 for the existing Liquidity Taker Event Report for Simple Orders, proposed Exchange Rule 531(c)(1)(i) would provide that the following information would be included in the Report regarding the resting order: (A) the time the resting order was received by the Exchange;¹⁰ (B) symbol; (C) order reference number, which is a unique reference number assigned to a new order at the time of receipt; (D) whether the Recipient Member is an Affiliate¹¹ of the Member that entered the resting order; (E) origin type (e.g., Priority Customer,¹³ Market Maker);¹⁴ (F) side (buy or sell); and (G) displayed price and size of the resting order.¹⁵

Execution Information. Like current paragraph (a)(1)(ii) of Exchange Rule

currently offer any non-displayed orders types on its options trading platform.

¹⁰ The time the Exchange received the resting order would be in nanoseconds and is the time the resting order was received by the Exchange's System.

¹¹ The term "affiliate" of or person "affiliated with" another person means a person who, directly, or indirectly, controls, is controlled by, or is under common control with, such other person. See Exchange Rule 100.

¹² The Report will simply indicate whether the Recipient Member is an Affiliate of the Member that entered the resting order and not include any other information that may indicate the identity of the Member that entered the resting order.

¹³ The term "Priority Customer" means a person or entity that (i) is not a broker or dealer in securities, and (ii) does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). The number of orders shall be counted in accordance with Interpretation and Policy .01 to Exchange Rule 100. See Exchange Rule 100.

¹⁴ The term "Market Maker" refers to "Lead Market Makers", "Primary Lead Market Makers" and "Registered Market Makers" collectively. See Exchange Rule 100.

¹⁵ The Exchange notes that the displayed price and size are also disseminated via the Exchange's proprietary data feeds and the Options Price Reporting Authority ("OPRA"). The Exchange also notes that the displayed price of the resting order may be different than the ultimate execution price. This may occur when a resting order is displayed and ranked at different prices upon entry to avoid a locked or crossed market.

531 for the existing Liquidity Taker Event Report for Simple Orders, proposed Exchange Rule 531(c)(1)(ii) would provide that the following information would be included in the Report regarding the execution of the resting order: (A) the PBBO¹⁶ at the time of execution;¹⁷ (B) the ABBO¹⁸ at the time of execution;¹⁹ (C) the time first response that executes against the resting order was received by the Exchange and the size of the execution and type of the response;²⁰ and (D) whether the response was entered by the Recipient Member. If the resting order executes against multiple contra-side responses, only the PBBO and ABBO at the time of the execution against the first response will be included.

Exchange Rule 531(a)(1)(ii)(D) provides that the existing Liquidity Taker Event Report for Simple Orders also includes the time difference between the time the resting order was received by the Exchange and the time the first response that executes against the resting order was received by the Exchange. The proposed Report would not include the same information because that timeframe could be for an extended period of time since the proposed Report focuses on orders that have been resting on the Simple Order Book for longer than 200 microseconds and, therefore, the Exchange believes is less likely to be valuable to the Recipient Member.

Recipient Member's Response Information. Like current paragraph (a)(1)(iii) of Exchange Rule 531 for the existing Liquidity Taker Event Report for Simple Orders, proposed Rule 531(c)(1)(iii) would provide that the following information would be included in the Report regarding response(s) sent by the Recipient Member: (A) Recipient Member identifier; (B) the time difference

¹⁶ The term "PBBO" means the best bid or offer on the Exchange. See Exchange Rule 100.

¹⁷ Exchange Rule 531(c)(1)(ii)(A) would further provide that if the resting order executes against multiple contra-side responses, only the PBBO at the time of the execution against the first response will be included.

¹⁸ The term "ABBO" or "Away Best Bid or Offer" means the best bid(s) or offer(s) disseminated by other Eligible Exchanges (defined in Exchange Rule 1400(g)) and calculated by the Exchange based on market information received by the Exchange from OPRA. See Exchange Rule 100.

¹⁹ Exchange Rule 531(c)(1)(ii)(B) would further provide that if the resting order executes against multiple contra-side responses, only the ABBO at the time of the execution against the first response will be included.

²⁰ The time the Exchange received the response order would be in nanoseconds and would be the time the response was received by the Exchange's network, which is before the time the response would be received by the System.

between the time the first response that executes against the resting order was received by the Exchange and the time of each response sent by the Recipient Member, regardless of whether it executed or not;²¹ (C) size and type of each response submitted by Recipient Member; and (D) response reference number, which is a unique reference number attached to the response by the Recipient Member.

Timeframe for Data Included in Report

The timeframe covered by the proposed Report is the primary difference between it and the existing Liquidity Taker Event Report for Simple Orders. The existing Liquidity Taker Event Report for Simple Orders provides data for executions and contra-side responses that occurred within 200 microseconds of the time the resting order was received by the Exchange. Meanwhile, the proposed Report would include the same data as the Liquidity Taker Event Report for Simple Orders but would focus on executions and contra-side responses that occurred after 200 microseconds of the time the resting order was received by the Exchange, and within 200 microseconds of receipt of any Member's first attempt to execute against the resting order after the initial 200 microsecond time period has expired. More specifically, the resting order must rest on the Simple Order Book for at least 200 microseconds and once that initial 200 microsecond period has passed, a Member must then submit an order to attempt to execute against that resting order. This event starts a second 200 microsecond period within which the proposed Report would include data on executions and contra-side responses submitted by the Recipient Member to execute against that resting order.

For example, Member A submits an order that is posted to the Simple Order Book. 200 microseconds passes and Member A's order remains posted to the Simple Order Book. Then Member B enters a marketable order to execute against Member A's resting order, starting the second 200 microsecond window. Within this next 200 microsecond window, Member C sends a marketable order to execute against Member A's resting Order. Because Member B's order is received by the Exchange before Member C's order, Member B's order executes against

²¹ For purposes of calculating this duration of time, the Exchange will use the time the resting order and the Recipient Member's response(s) is received by the Exchange's network, both of which would be before the order and response(s) would be received by the System. This time difference would be provided in nanoseconds.

Member A's resting order. The proposed Report would provide Member C the data points necessary for that firm to calculate by how much time they missed executing against Member A's resting order.

The above timeframe would be codified under proposed paragraph (c)(2) of Rule 531 which would provide that the proposed Report would include the data set forth under Rule 531(c)(1) described above for executions and contra-side responses that occurred (i) after 200 microseconds of the time the resting order was received by the Exchange and (ii) within 200 microseconds of receipt of the first attempt to execute against the resting order after the initial 200 microsecond time period under (c)(2)(i) of this paragraph has expired.

Scope of Data Included in the Report

Like current paragraph (a)(3) of Exchange Rule 531 for the existing Liquidity Taker Event Report for Simple Orders, proposed paragraph (c)(3) of Exchange Rule 531 would provide that the proposed Report will only include trading data related to the Recipient Member and, subject to the proposed paragraph (4) of Rule 531(c) described below, will not include any other Member's trading data other than that listed in paragraphs (1)(i) and (ii) of Exchange Rule 531(c) described above.

Historical Data

Like current paragraph (a)(4) of Exchange Rule 531 for the existing Liquidity Taker Event Report for Simple Orders, proposed paragraph (c)(4) of Rule 531 would specify that the proposed Report will contain historical data from the prior trading day and will be available after the end of the trading day, generally on a T+1 basis.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.²² Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²³ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in

securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. This proposal is in keeping with those principles in that it promotes increased transparency through the dissemination of the optional Report to those interested in subscribing to receive the data. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²⁴ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The timeframe covered by the proposed Report is the primary difference between it and the existing Liquidity Taker Event Report for Simple Orders. However, this difference only pertains to the timeframe covered by each report, with each report containing the exact same data fields with one exception described here. The existing Liquidity Taker Event Report for Simple Orders provides data for executions and contra-side responses that occurred within 200 microseconds of the time the resting order was received by the Exchange. Meanwhile, the proposed Report would basically include the same data as the Liquidity Taker Event Report for Simple Orders but would focus on executions and contra-side responses that occurred after 200 microseconds of the time the resting order was received by the Exchange and one additional difference. The one difference is that unlike the existing Liquidity Taker Event Report for Simple Orders, the proposed Report would not include the time difference between the time the resting order and first response that executes against the resting order are received by the Exchange. Each report focuses on 200 microsecond windows with the existing Report's window starting at the time of receipt of the resting order and the proposed Report's window starting with the first attempt to execute against the resting order after the order was resting on the Simple Order Book for at least 200 microseconds.

The Exchange believes the proposed Report will serve to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general protect investors and the public interest because it will benefit investors by facilitating their prompt access to the value added information that is included in the proposed Report. The

proposed Report will allow Members to access information regarding their trading activity that they may utilize to evaluate their own trading behavior and order interactions.

Like the existing Liquidity Taker Event Report for Simple Orders, the proposed Report is designed for Members that are interested in gaining insight into latency in connection with orders that failed to execute against an order resting on the Exchange's Simple Order Book by providing those Members data to analyze by how much time their order may have missed an execution against a contra-side order resting on the Book. The Exchange believes that providing this optional latency data to interested Members is consistent with facilitating transactions in securities, removing impediments to and perfecting the mechanism of a free and open market and a national market system, and, in general, protecting investors and the public interest because it provides greater visibility into the latency of Members' incoming orders. Members may use this data to optimize their models and trading patterns in an effort to yield better execution results by calculating by how much time their order may have missed an execution.

Like the existing Liquidity Taker Event Report for Simple Orders, the proposed Report is designed to offer latency information in a systematized way and standardized format to any Member that chooses to subscribe to the proposed Report. As a result, the proposal will make latency information for liquidity-seeking orders available in an equalized manner and will increase transparency, particularly for Recipient Members that may not have the expertise to generate the same information on their own. The proposed Report may better enable Recipient Members to increase the fill rates for their liquidity-seeking orders. At the same time, as is also discussed above, the Report is designed to prevent a Recipient Member from learning other Members' sensitive trading information. The Report would not be a real-time market data product, as it would provide only historical trading data for the previous trading day, generally on a T+1 basis. In addition, the data in the Report regarding incoming orders that failed to execute would be specific to the Recipient Member's orders, and other information in the proposed Report regarding resting orders and executions would be anonymized if it relates to a Member other than the Recipient Member.

The proposed Report generally contains three buckets of information,

²² 15 U.S.C. 78f(b).

²³ 15 U.S.C. 78f(b)(5).

²⁴ *Id.*

each of which are identical to the same buckets of information contained in the existing Liquidity Taker Event Report for Simple Orders, with one exception discussed herein and again below. The first two buckets include information about the resting order and the execution of the resting order. This information is generally available from other public sources, such as OPRA and the Exchange's proprietary data feeds, or is similar to information included in a report offered by another exchange. For example, OPRA provides bids, offers, and consolidated last sale and quotation information for options trading on all national securities exchanges, including the Exchange. In addition, the Exchange offers the Top of Market ("ToM") feed which provides real-time quote and last sale information for all displayed orders on the Book.²⁵

Specifically, the first bucket of information contained in the Report for the resting order includes the time the resting order was received by the Exchange, the symbol, unique reference number assigned at the time of receipt, side (buy or sell), and the displayed price and size of the resting order. Further, the symbol, origin type, side (buy or sell), and displayed price and size are also available either via OPRA or the Exchange's proprietary data feeds. The first bucket of information also indicates whether the Recipient Member is an Affiliate of the Member that entered the resting order. This data field will not indicate the identity of the Member that entered the resting order and would simply allow the Recipient Member to better understand the scenarios in which it may execute against the orders of its Affiliates.²⁶

The second bucket of information contained in the Report regards the execution of the resting order and includes the PBBO and ABBO at the time of execution. These data points are also available either via OPRA or the Exchange's proprietary data feeds. The second bucket of information will also indicate whether the response was entered by the Recipient Member. This data point is simply provided as a convenience. If not entered by the Recipient Member, this data point will be left blank so as not to include any identifying information about other Member activity. The second bucket of information also includes the size, as well as the time and type of first response that executes against the resting order. These data points would

assist the Recipient Member in analyzing by how much time their order may have missed an execution against a contra-side order resting on the Book. Unlike the existing Liquidity Taker Event Report for Simple Orders, the proposed Report would not include the time difference between the time the resting order and first response that executes against the resting order are received by the Exchange. The proposed Report would not include this data point because the Exchange understands Recipient Members may not find it useful due to the fact that the proposed Report focuses on orders that have been resting on the Simple Order Book for longer than 200 microseconds. Therefore, the Exchange does not propose to include this data point as a means to streamline the proposed Report and remove unnecessary data.

The third bucket of information is about the Recipient Member's response(s) and the time their response(s) is received by the Exchange. This includes the time difference between the time the first response that executes against the resting order was received by the Exchange and the time of each response sent by the Recipient Member, regardless of whether it executed or not. As above, this data point would assist the Recipient Member in analyzing by how much time their order may have missed an execution against a contra-side order resting on the Book. This bucket would also include the size and type of each response submitted by the Recipient Member, the Recipient Member identifier, and a response reference number which is selected by the Recipient Member. Each of these data points are unique to the Recipient Member and should already be known by Recipient Member even if not included in the Report.

Like the existing Liquidity Taker Event Report for Simple Orders, the Exchange proposes to provide the Report on a voluntary basis and no Member will be required to subscribe to the Report. The Exchange notes that there is no rule or regulation that requires the Exchange to produce, or that a Member elect to receive, the Report. It is entirely a business decision of each Member to subscribe to the Report. The Exchange proposes to offer the Report as a convenience to Members to provide them with additional information regarding trading activity on the Exchange on a delayed basis after the close of regular trading hours. A Member that chooses to subscribe to the Report may discontinue receiving the Report at any time if that Member determines that the information

contained in the Report is no longer useful.

In summary, the proposed Report will help to protect a free and open market by providing additional data (offered on an optional basis) to the marketplace and by providing investors with greater choices.²⁷ Additionally, the proposal would not permit unfair discrimination because the proposed Report will be available to all Exchange Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The Exchange believes that the proposed Report will enhance competition²⁸ by providing a new option for receiving market data to Members. The proposed Report will also further enhance competition between exchanges by allowing the Exchange to expand its product offerings to include an additional report to provide latency information requested by Members.

In this instance, the proposed rule change to offer the optional Report is in response to Member interest and requests for such information, including from some Members that subscribe to the existing Liquidity Taker Event Report for Simple Orders. The Exchange does not believe the proposed Report will have an inappropriate burden on intra-market competition between Recipient Members and other Members who do not receive the Report. As discussed above, the first two buckets of information included in the Report contain information about the resting order and the execution of the resting order, both of which are generally available to Members that choose not to receive the Report from other public sources, such as OPRA and the Exchange's proprietary data feeds. The third bucket of information is about the Recipient Member's response and the time their response is received by the Exchange, information which the Recipient Member would be able to obtain without receiving the Report. Additionally, some Members may already be able to derive a substantial amount of the same data that is provided by some of the components based on their own executions and algorithms.

²⁷ See Sec. Indus. Fin. Mkts. Ass'n (SIFMA), Initial Decision Release No. 1015, 2016 SEC LEXIS 2278 (ALJ June 1, 2016) (finding the existence of vigorous competition with respect to non-core market data).

²⁸ *Id.*

²⁵ See Section 6(a) of the Exchange's fee schedule.

²⁶ The Exchange's surveils to monitor for abhorrent behavior related to internalized trades and identify potential wash sales.

In sum, if the proposed Report is unattractive to Members, Members will opt not to receive it. Accordingly, the Exchange does not believe that the proposed change will impair the ability of Members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act²⁹ and Rule 19b-4(f)(6)³⁰ thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-PEARL-2023-01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-PEARL-2023-01. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-PEARL-2023-01, and should be submitted on or before March 7, 2023.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³¹

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-96844; File No. SR-CBOE-2023-010]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Fee Schedule for the Cboe Silexx Platform

February 8, 2023.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on February 2, 2023 Cboe Exchange, Inc. ("Cboe Options" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the "Exchange" or "Cboe Options") proposes to amend fees for the Cboe Silexx platform. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (<http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx>), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

²⁹ 15 U.S.C. 78s(b)(3)(A).

³⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.
